Full product description

Wi-Fi radio management

The **Rocket Prism AC** integrates a separate Wi-Fi radio for quick and easy setup using a mobile device.

Improved surge protection

Rocket Prism AC has increased protection against **ESD** events.

GPS synchronization

Rocket Prism AC supports **GPS synchronization** to provide faster, more scalable networks. The performance of the device is about 90% better compared to competitive solutions.

Revolutionary filtration technology

Ubiquiti's patented **airPrism** technology provides breakthrough radio selectivity efficiency in unlicensed wireless band. AirPrism technology isolates signals in the operating channel to **increase throughput**.

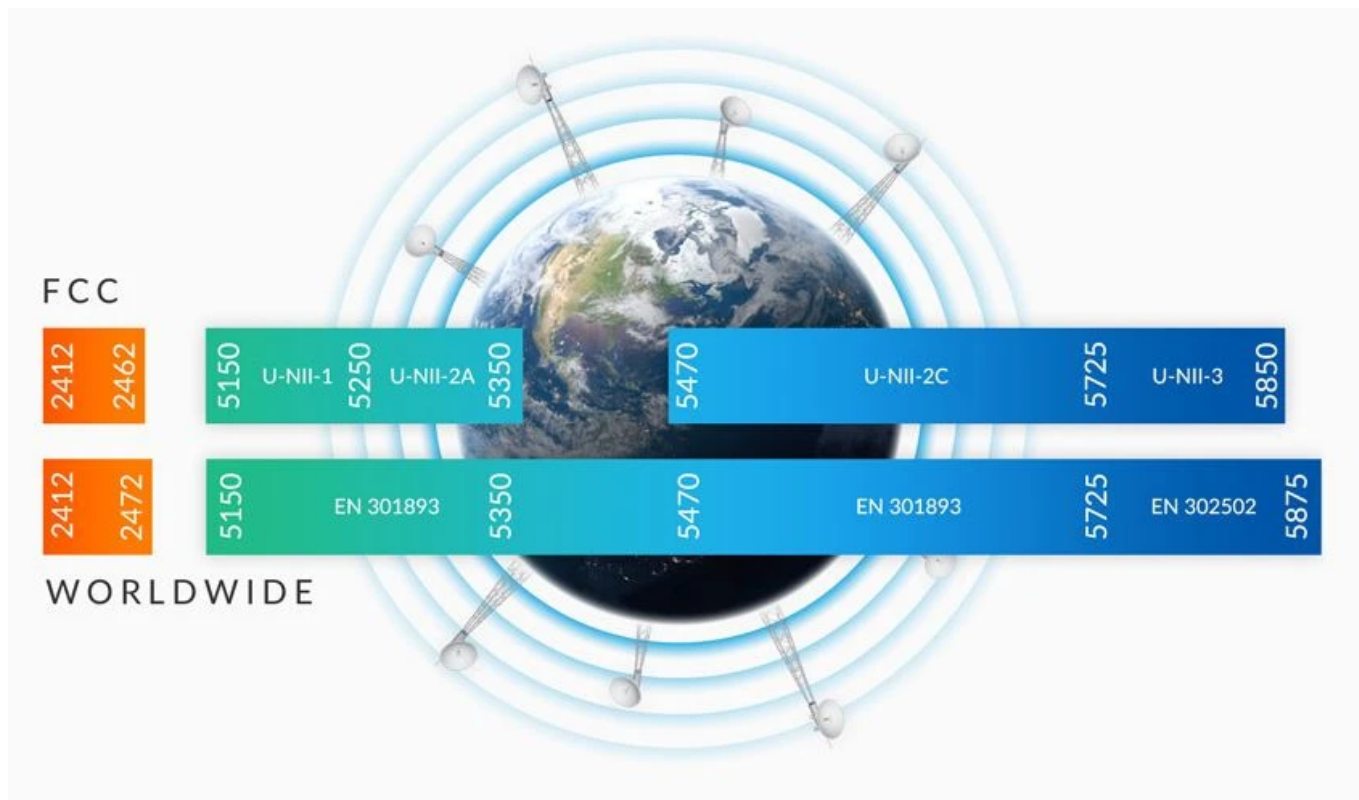

Designed for high performance

The Rocket Prism AC has a metal **screened enclosure**, GPS, **airPrism** and an airView spectrum analyzer in real time to ensure maximum spectral efficiency.

Full-band 2.4 GHz coverage

Rocket Prism 2AC provides full **2.4 GHz** coverage with a single radio.

Now with airOS 8

airOS 8 software offers advanced features including **airMAX ac** protocol support, real-time signal analysis and a completely new design for increased efficiency.
