Price: **512.77 zł** gross / 416.89 zł net

Manufacturer: UBIQUITI

Referention number: DNXEIHLUEKNM

### Full product description

### A breakthrough in performance

Ubiquiti Rocket access points together with airMAX ac technology offer **lower latency**, high noise immunity, scalability and **significantly increased performance**.

### Excellent data processing

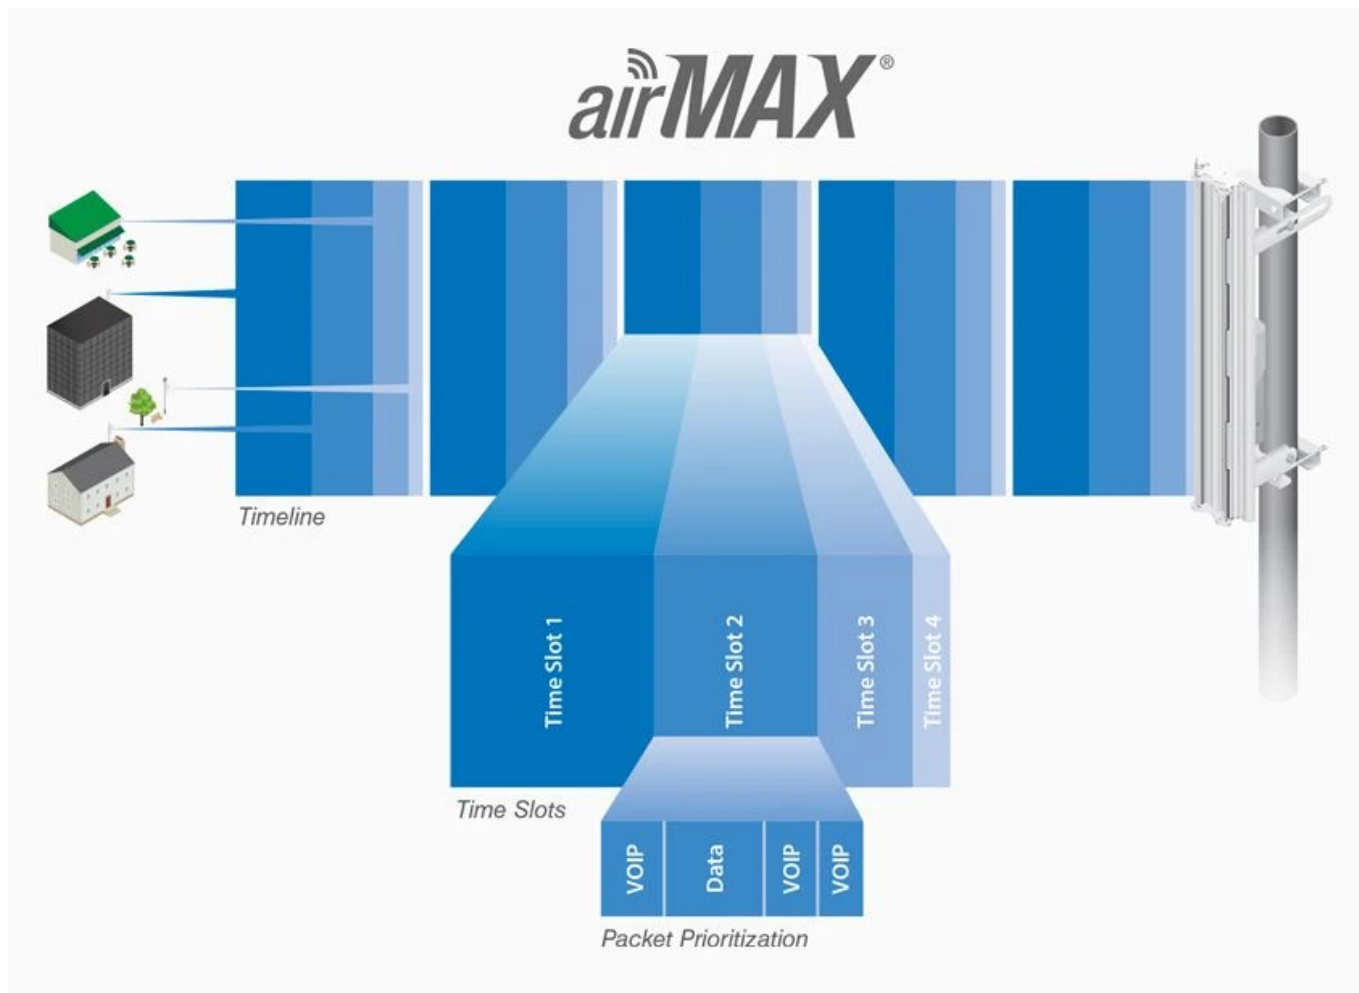

The **Ubiquiti airmax** software with a custom chipset will greatly reduce TDMA delay and improve network scalability. The custom processor provides hardware acceleration of the airMAX planner to support **high data rate** and dense modulation used in airMAX ac technology.

### Plug and Play function

Innovative **airMAX ac** antennas are characterized by significant advances in beam and energy insulation in order to **increase throughput** of the network.

### Advanced software technology

Ubiquiti's **airMAX** technology has been tried and tested in millions of installations around the world, demonstrating exceptional performance in open environments. **The TDMA airMAX** protocol provides unprecedented scalability, high throughput and **low latency** in unlicensed, multipoint networks.

## New airOS 8 software

**airOS 8** offers extensive functions, including **operation of the airMAX ac** protocol, real-time wireless signal analysis and a completely new design providing **enhanced functionality**.

## Spectrum analysis

**airView** allows to identify noise signatures and plan the network in such a way that **minimize signal interference**. airView performs the following functions:

- Constantly monitors ambient noise
- Collects energy data in real time spectral views.

- Helps optimize channel selection and network design
