Full product description

Breakthrough design and performance

The Ubiquiti antenna easily integrates with RocketM radio. The radio together with the RD-3G26 antenna create a powerful **PtP 2x2 MIMO bridge**. For network designers it is a flexible and convenient solution, and also very practical. RocketDish and Rocket devices have been designed to be easy to install and work with any other Rocket device.

Robust construction

The **airMAX** antennas are designed with durability for outdoor use. The antenna operates in the **3GHz** frequency band and has an energy gain of **26dBi**. The RocketDish RD-3G26 is designed to work with **802.11n** devices.

Easy Plug and Play installation

Installation of the Ubiquiti RocketDish 3GHz 26dBi dual parabolic antenna does not require any additional elements or tools.
