Price: **512.77 zł** gross / 416.89 zł net

Manufacturer: UBIQUITI

Referention number: DNXHINSKEHR

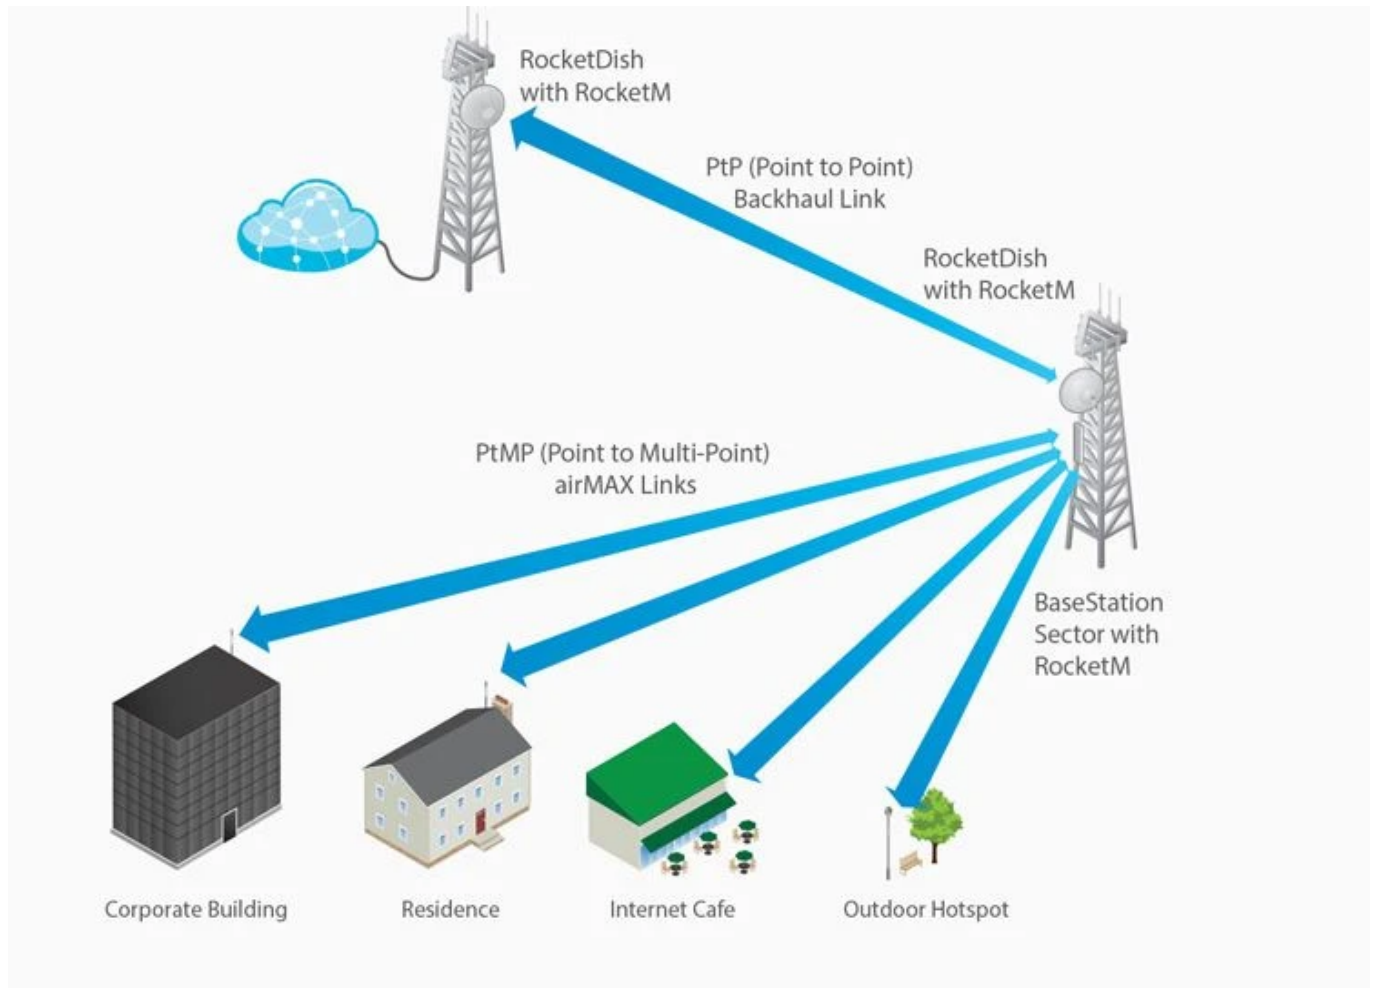

### Product features

|                                    |                   |
|------------------------------------|-------------------|
| Regulatory Approvals               | EN 302 326 DN2    |
| Height                             | 304 mm            |
| Antenna type                       | Sector antenna    |
| Width                              | 650 mm            |
| Depth                              | 650 mm            |
| Harmonized System (HS) code        | 85177100          |
| Antenna gain level (max)           | 30 gain           |
| Mounting                           | Wall              |
| Product colour                     | White             |
| Voltage Standing Wave Ratio (VSWR) | 1.4:1             |
| Vertical beam width (2.4 GHz)      | 2                 |
| Horizontal beam width              | 5 °               |
| Vertical beam width                | 5 °               |
| Polarization                       | Dual polarization |
| Designation                        | Outdoor           |
| Product weight                     | 9800 g            |

### Full product description

### Powerful performance

The Ubiquiti RocketDish RD-5G30 antenna is a high class device operating in the **5GHz** frequency band and is remarkable with its gain of **30dBi**. The **RocketDish** antenna offers **2x2** bipolar operation characteristics, its dish diameter is 648 mm. RocketDishes along with Rocket devices can be deployed in a network to deliver bandwidth from the ISP's network to the adjacent tower. The airMAX sector with Rocket technology then provides ISP customers with the appropriate capacity.

## Installation of the RocketDish antenna

### Robust construction

RocketDish antennas are equipped with a reflector with excellent beam directionality and have a **stable mechanical construction** using a durable material for outdoor use.

### Plug and Play integration

RocketDish and Rocket devices are designed to be **easy to install** and work with all other Rocket devices. Installation of the Ubiquiti RocketDish 5GHz 30dBi dual parabolic antenna does not require any additional components or resources. Mounting parts of RocketM devices correspond to dedicated mountings used for airMax antennas.
