Full product description

Android 13.0 tablet - Modern multimedia device for everyone

The **Extralink CP30 tablet with Android 13.0** is a combination of cutting-edge technology and comprehensive functionality, designed to give you an exceptional experience. Android 13.0 guarantees **smooth operation and instant access to the latest applications and features** that will meet the expectations of even the most demanding. Regular updates and the rich Android 13.0 platform open up wide possibilities for personalization and seamless integration with other devices.

Powerful octa-core SC9863A processor

At the heart of the tablet is the powerful **octa-core SC9863A processor**. It provides exceptional performance, whether you're browsing the Internet, using apps or playing games. The eight-core architecture allows for smooth, seamless multitasking. Whether you use the tablet for studying, working or entertainment, the SC9863A processor can handle any task.

8 GB RAM with virtual expandability

The tablet is equipped with **8 GB of RAM**, which allows you to comfortably use multiple applications simultaneously. **Physically 4 GB is available, and an additional 4 GB is virtual memory** (software expansion), which significantly increases the overall performance of the device. Such a large amount of RAM guarantees smooth operation even with more demanding programs and allows running more applications in the background without slowdowns.

Spacious 128GB internal memory

With **128GB of built-in memory**, you have plenty of space for all your files - from photos and videos to documents and apps. You no longer have to worry about lack of free space. In addition, **the tablet supports external memory cards**, allowing you to further expand the available space if needed.

2.0 MP (front) and 8.0 MP (rear) cameras

The tablet has two cameras to enhance its functionality. **The front 2.0 MP camera** is ideal for video conferencing and online conversations. **The rear 8.0 MP camera** allows you to capture important moments in good quality. Whether you want to take a picture of a document or capture memories, the 8.0 MP camera will meet your needs. Satisfactory image quality and stabilization help you get clear photos in a variety of conditions.

Powerful 6000 mAh battery

Equipped with a **6,000 mAh battery**, the Extralink CP30 tablet provides long hours of work and entertainment on a single charge. This capacious battery makes the tablet an ideal companion for travel, remote work or movie screenings, eliminating the worry of rapid drainage - crucial for heavy use.

IPS display 1280 x 800 pixels

The tablet features a **bright IPS display with a resolution of 1280 x 800 pixels**. It guarantees sharp images and vivid, natural colors. IPS technology provides **wide viewing angles**, so the image remains clear and unchanged regardless of perspective - ideal for watching movies, viewing photos or working. The screen offers good image quality both indoors and outdoors, making the tablet a versatile tool for entertainment and work.
