Full product description

Power your PoE devices with confidence with Ubiquiti U-PoE !

This advanced PoE power supply is designed to **provide stable and efficient power** for your network devices such as UniFi Access Points, G4 PTZ cameras and other demanding devices. With Ubiquiti U-PoE EU, your network will run reliably and you will be able to focus on what really matters.

High output power

The Ubiquiti U-PoE EU power supply delivers up to 60W of power, making it **ideal for PoE devices** with high power requirements. This allows you to power devices such as the UA Hub or G4 PTZ, ensuring their stable and uninterrupted operation. The 60W power can **support even the most demanding devices**, eliminating the need for additional power supplies and simplifying installation.

Security at the highest level

The PoE power supply is equipped with **advanced surge, peak pulse and overload protection**, providing protection for both the power supply and the devices connected to it. Features such as surge protection and current limiting ensure the long-term reliability and security of your network.

Ease of installation and monitoring

The Ubiquiti U-PoE EU has an RJ45 connector for data transfer and PoE output , which simplifies installation and eliminates the need for additional wiring. The built-in LED indicator makes it easy to monitor the status of the power supply, allowing you to quickly diagnose any problems.

Universal compatibility

The PoE power supply is compatible with the 802.3af/at/bt standard, ensuring compatibility with a wide range of Ubiquiti and third-party network devices. With a universal AC input (100-240V), the power supply can be used in different regions and power conditions, making it a versatile solution for global installations.
