Full product description

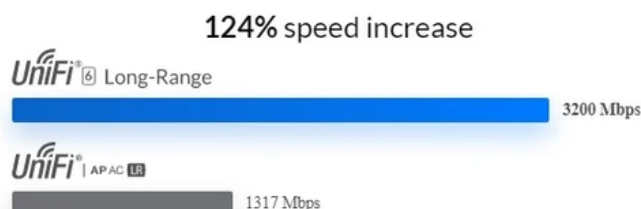

Ubiquiti U6-LR Access Point

UniFi 6 LR AP is a next-generation **Wi-Fi 6** access point with a 4x4 MU-MIMO antenna specifically designed to **extend the range of your wireless network**. UniFi **6 Long Range Access Point** solutions deliver their full potential in high traffic environments such as warehouses, hangars and stadiums. However, the range of the UniFi **6 Long Range Access Point** is much wider and is suitable for deployment in offices, apartments and homes. The antennas of the UniFi **6 Long Range Access Point** are tuned for situations where there is a need for better signal reception.

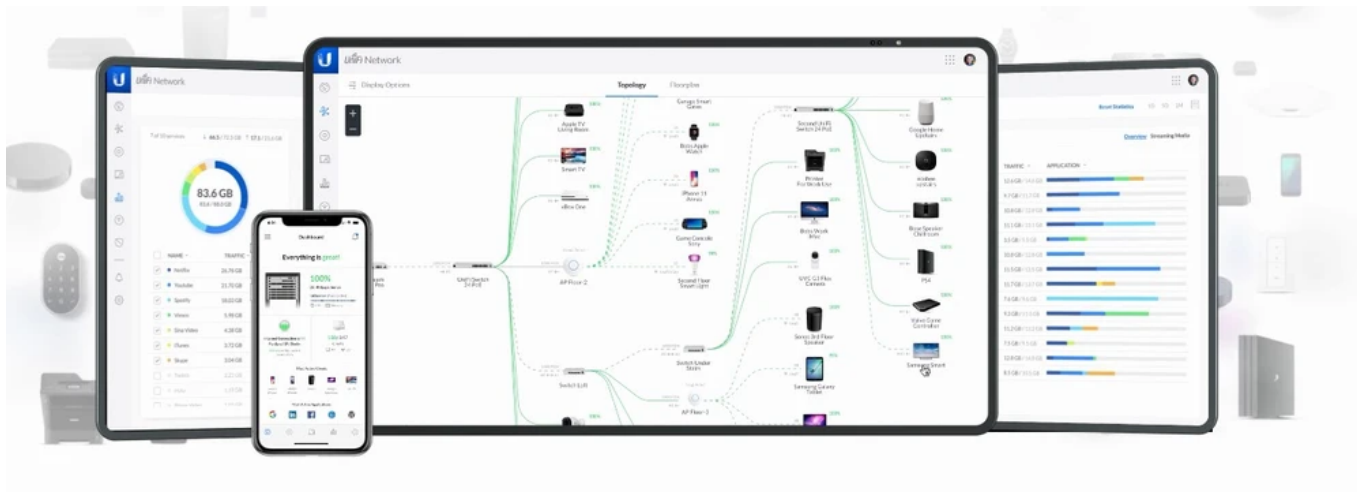

Incredible data transfer rates

Featuring **4x4 MU-MIMO** and **OFDMA** antennas in the 5 GHz band and 2x2 MIMO antennas in the 2.4 GHz band, the next generation **UniFi 6 LR Access Point** delivers a total wireless data transfer rate of up to **2.7 Gbps**.

New technologies with easy management

Support for the new **Wi-Fi 6 standard** allows to provide high quality services to more clients using the algorithms of the new **802.11ax** standard. The device is several times more efficient than the classic UniFi 6 Lite access point, optimizing costs in open scenarios and reducing access point densification and switching costs. **The omnidirectional antenna array** is designed to provide increased RF coverage and is optimized for **face-down ceiling mounting**. The **UniFi 6 Long Range Access Point** software is centrally managed, configured and updated through the standard **Ubiquiti UniFi OS Console** application, allowing maximum flexibility to apply necessary system modifications with minimal effort.

Main features

- Powered by 802.3at PoE (PoE injector not included)
- Dual-core 1.3GHz processor (now upgraded to support 1Gbps full duplex TCP/IP)
- Four-stream high performance Wi-Fi 6 technology
- 2.4 GHz 4x4 MIMO band with 600 Mbps radio speed
- 5 GHz band 4x4 MU-MIMO and OFDMA with 2.4 Gbps radio speed
