Price: **887.40 zł** gross / 721.46 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGJONPGRMMPK

Information:

Ubiquiti U7-Pro-XG-B is a high-performance WiFi 7 access point for home and office, offering the 6 GHz band, channels up to 320 MHz and support for over 300 devices. It provides a fast, stable connection across a large area of up to 140 m², ideal for video conferences, VR and working in congested networks. Equipped with a 10 GbE port and PoE+ power, it enables quick and convenient installation without additional power supplies. Integrated omnidirectional antennas ensure even coverage, while UniFi integration makes it easy to manage and monitor the entire network in one place.

Full product description

UniFi - Your Network on New Terms

Ubiquiti U7-Pro-XG-B is a **WiFi 7 access point** that brings a new level of quality to network operation. Thanks to the **6 GHz band**, support for over **300 devices** and transmission speeds reaching several gigabits, this device is ideal for offices and homes with a large number of users. The **U7 Pro** is a way to fully exploit the capabilities of the new generation of connectivity, while maintaining reliable range and stable operation.

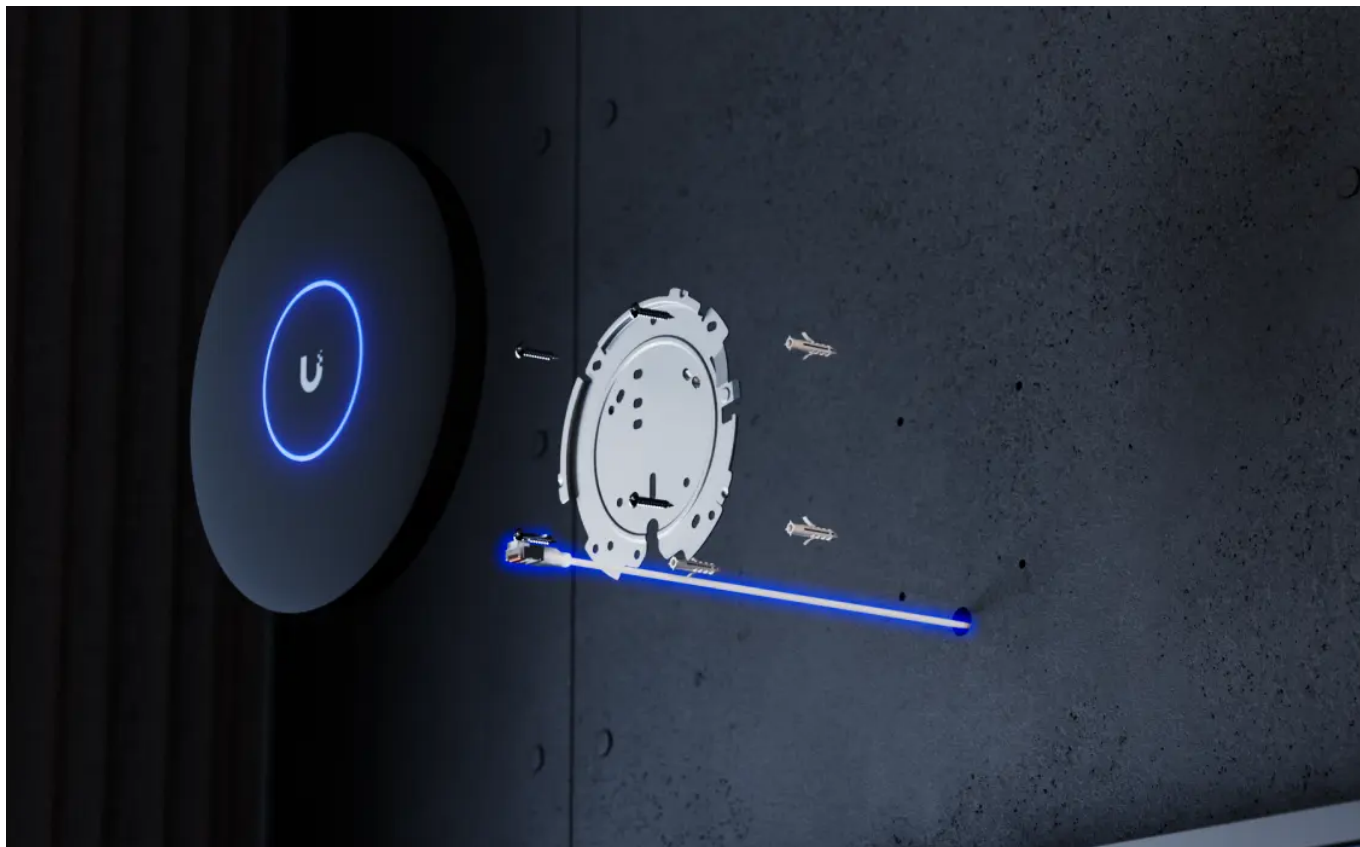

Ubiquiti U7-Pro Unifi - The Power of WiFi 7 in Your Space

Support for **WiFi 7** (IEEE 802.11be - Enhanced High Throughput, increased throughput) delivers significantly higher speeds than previous standards. Support for the **6 GHz band** and channels up to **320 MHz** ensures smooth performance for demanding applications, including video conferences and VR (Virtual Reality). The **U7 Pro access point** enables stable transmission and reduced interference in a crowded network environment.

Gigabit Ethernet - Speed and Freedom Without Compromise

The device is equipped with a **10 GbE (10 Gigabit Ethernet)** port, allowing fast data transfer over a wired network. Thanks to **PoE+** support (Power over Ethernet Plus - power supplied via the network cable with higher output), installation is simple and eliminates the need for additional power adapters. It is convenient and saves space in the network infrastructure

Integrated Omnidirectional Antennas - Coverage That Works for You

Ubiquiti U7-Pro-XG-B provides network coverage over an area of up to **140 m²**, which is enough for large flats and open-plan offices. The built-in omnidirectional antennas emit the **wireless** signal evenly in every direction, ensuring consistent coverage. This allows users to connect multiple devices without worrying about a loss of transmission quality.

UniFi Network - Management and Monitoring in One Place

U7 Pro is part of the **UniFi** ecosystem, which enables full network management from a single panel. The **UniFi Network** app allows control of bandwidth, traffic and configuration. It is a convenient solution that works well in both professional business networks and at home.
