Full product description

Security and Access Control

The **Ubiquiti Access G2 Starter Kit (UA-G2-SK)** is a basic **Ubiquiti Access** starter kit that includes everything you need to secure one door with one reader. This advanced access system is ideal for companies that want to **provide top-level security and access control**.

New Generation of UniFi Access System

The **UniFi Access G2 Starter Kit** is the second generation of the basic component kit for installing a **UniFi Access** system. Compared to the previous version, **G2** offers even more optimized installation and management. This kit is fully compatible with most electric and magnetic locks, as well as **12V** accessories such as motion sensors, buttons and alarms. This ensures that your system will work efficiently and effectively in any situation.

Quick and Easy Installation

Installation of the entire **Ubiquiti Access G2 Starter Kit** ecosystem is extremely fast and simple. With just a few steps, you can integrate all components and enjoy full control over access to your facility. The system is powered via **PoE**, which further simplifies installation by eliminating the need for additional wiring. Note, however, that the PoE **power supply** is not included in the box and must be purchased separately.

NFC and NFC Card Reader

The **UA-G2-SK** system uses NFC technology, which means you can easily manage access with an NFC card reader. This allows users to access the facility quickly and seamlessly.

Simple User Management

The Ubiquiti Access G2 Starter Kit offers simple user management, allowing you to easily add, remove and modify access permissions for different users.
