Full product description

UBIQUITI UA-G3-SK-PRO G3 STARTER KIT PRO - Complete Access Protection System.

The Ubiquiti UA-G3-SK-PRO G3 STARTER KIT PRO is a comprehensive solution for **access control** on your network. It includes everything you need to implement an advanced access monitoring system, covering NFC card readers, **Door Hub** and additional accessories. With support for **PoE** (Power over Ethernet) and **compatibility with UniFi Access**, this kit provides easy installation and management.

Complete Access Protection System

Ubiquiti UA-G3-SK-PRO offers a full **access control** suite, including G3 Reader Pro, G3 Reader and Pocket Keyfobs. With these devices, you have full control over access to a building or room. **The access control system** is easy to install and can support various authentication methods, such as NFC (Near-Field Communication), cards and key fobs.

Power supply via PoE

The Ubiquiti UA-G3-SK-PRO supports **PoE** (Power over Ethernet), which allows both data and power to be transmitted over a single pair of Ethernet cables. This makes installation simpler and more aesthetically pleasing, eliminating the need for separate power cables. **PoE** also ensures power stability, which is crucial in access security systems

High Resistance to Atmospheric Conditions

The **Ubiquiti UA-G3-SK-PRO** kit is weatherproof thanks to the **IP55** certification for the **G3** reader. This means that the device is resistant to dust and moisture, allowing it to be installed both indoors and outdoors. **The weather resistance** means that the system will perform well in a variety of environments without fear of damage from outdoor conditions.

Management and Integration with UniFi Access

The **Ubiquiti UA-G3-SK-PRO** system is fully compatible with the **UniFi Access** platform, allowing easy management of all devices from a single application. **UniFi Access** allows you to remotely monitor, configure and adjust access settings on your system. With this feature, you can conveniently control access to different zones, manage users and monitor events.
