Full product description

Ubiquiti UA-Pro Bluetooth NFC Access Reader

The **UA-Pro** is a universal access device that combines **the functions of a video intercom and an NFC card reader**. Used as part of the **Ubiquiti UniFi Access** access control system, it is the optimal choice when maximum control is required.

The **UA-Pro** features an extensive set of features. This model features an **integrated display**, as well as a built-in **147.5-degree** camera, allowing you to maintain full two-way video contact with your visitor. The integrated **NFC module** can work with the following card standards:

- Tag NFC 1, 2, 3, 4, 5
- MIFARE Classic
- MIFARE Plus
- MIFARE Ultralight
- MIFARE DESFire EV1/EV2

Control from a single device

The **UA-Pro** is connected to the **UA-Hub** master switch, which synchronizes the operation of **all UniFi Access devices**, including proximity sensors, magnetic locks and cameras. The unit, despite its **rich functionality**, has fairly modest dimensions of 73.40 x 62.28 x 26.55. Wall mounting is provided. A core drill for flush mount sockets with a diameter of 50mm is used to prepare the socket, then the base of the device is mounted and screwed to the wall, followed by integration with the **main module UA-Pro**.

Low energy consumption

The UA-Pro is powered by **802.3af PoE**, with a maximum power consumption of **8.3 watts**. A standard Ethernet port is used to connect to the UA-Hub. Additionally, it should be noted that the device supports the **Bluetooth LE 4.2** wireless standard.
