Price: **761.37 zł** gross / 619.00 zł net

Manufacturer: UBIQUITI

Referention number: DNXGHIKKHRMLPM

Product features

Height	155 mm
Input voltage	5 V
Wall mountable	Yes
Width	130 mm
Depth	125 mm
Compliance certificates	CE
Power consumption (max)	15 W
Humidity measurement range	10 - 90%
Compatibility	UVC-AI-Pro
Protection features	Weatherproof
Operating temperature (T-T)	-30 - 50 °C
Brand compatibility	Ubiquiti Networks
Easy to install	Yes
International Protection (IP) code	IPX5
Power source type	DC
Product colour	White
Watch case material	Aluminium
Type	Enhancer
Designation	Outdoor
Product weight	490 g

Full product description

Infrared and radar for better detection

The Ubiquiti **UACC-AI-Pro-Enhancer-W** uses an advanced infrared (IR) system and integrated radar to accurately detect people and vehicles in a variety of conditions. The IR LED provides **a range of up to 40m**, while the radar improves detection accuracy **to 20m for people and 35m for vehicles**. It's a solution that significantly increases the effectiveness of monitoring, reducing the number of **false alarms**.

Greater range and precise detection

The **IR emitter** extends the **AI Pro** cameras' field of view, providing **IR with a range of up to 40m**. Radar additionally detects objects by measuring their exact location in real time. This means **better protection and greater detection accuracy** regardless of environmental conditions.

Built-in 600 lm floodlight

The device has an integrated **600-lumen** floodlight, which **improves nighttime visibility** and acts as a deterrent. With a **light temperature of 5700K**, the image is clearer, increasing the effectiveness of area monitoring.

Speaker for an extra level of security

The **UACC-AI-Pro-Enhancer-W** has a **built-in speaker** that can be used for warning sounds or voice communication. This **adds an extra layer of protection**, allowing for real-time response when an unauthorized presence is detected in the monitored area.

Weather resistance - IPX5

Thanks to its **IPX5 rating**, the device can operate in extreme weather conditions - rain, snow or moisture do not affect its operation. **The aluminum and polycarbonate housing** ensures long life and resistance to mechanical damage.
