Price: **46.58 zł** gross / 37.87 zł net

Manufacturer: UBIQUITI

Referention number: DNXGGKQMRMMH

Product features

Regulatory Approvals	TIA/EIA-568-B.2, ISO/IEC 11801
Cable shielding	S/UTP (STP)
Conductor material	Copper
AWG wire size	24
Storage temperature (T-T)	-30 - 75 °C
External diameter	6 mm
Harmonized System (HS) code	84733080
Cable length	8 m
Plug and Play	Yes
Operating temperature (T-T)	-40 - 80 °C
Sheath material	Thermoplastic elastomer (TPE)
Product colour	White
Cable type	Stranded
Cable standard	Cat5e
Product weight	315 g

Full product description

Invest in the reliability and performance of outdoor network connections with the Ubiquiti UACC-Cable-Patch-Outdoor-8m-WH.

This Category 5e LAN patchcord provides high quality and durability, meeting the highest industry standards. Thanks to the use of advanced technologies and materials, **this cable is ideal for anyone** looking for stable and weatherproof connections over longer distances.

High resistance to weather conditions

The Ubiquiti UACC-Cable-Patch-Outdoor-8m-WH cable is designed for outdoor use, as evidenced by its UV resistance to ASTM G 151/154 standards, so **you can count on a reliable connection even in harsh weather conditions**. In addition, the thermoplastic elastomer jacket material used provides protection against extreme temperatures from -40 to 80°C, making the cable ideal for use in various climate zones.

Flexibility and ease of installation

The 8-meter-long cable offers greater flexibility in terms of installation, allowing **the connection of devices located at different points in the network infrastructure**. Its minimum bend radius of 24 mm makes it easy to lay and route the cable even in hard-to-reach places. The light weight (200 g) and flexible design make the cable easy to install without any additional burden on the network infrastructure.

High-quality STP shielding

The cable features STP (Shielded Twisted Pair) shielding, which **effectively minimizes electromagnetic interference** and crosstalk, resulting in a stable and reliable connection. This is especially important in environments with a high volume of electronic devices.
