Full product description

Offering exceptional reliability and performance, the Ubiquiti UACC-Cable-PT-20m cable is the perfect solution for powering your devices.

Ideal for those who need power over a really long distance, this cable is designed to power Ubiquiti devices compliant with the Power TransPort standard. Designed with the highest standards of safety and durability in mind, this is a must-have for professional installations.

High performance and safety

The Ubiquiti UACC-Cable-PT-20m cable **is made of 12 AWG tinned copper**, which ensures excellent conductivity and minimal power loss. This makes the cable ideal for powering devices with high power consumption. The VW-1 flammability rating provides an extra layer of safety, **protecting against fires and providing peace of mind** during use.

Durable and resistant construction

The jacket made of thermoplastic elastomer guarantees resistance to mechanical damage and extreme temperatures from -40 to 80°C. The cable is therefore ideal for both indoor and outdoor applications. Thanks to its robust construction, **the cable is resistant to harsh environmental conditions**, ensuring long-lasting and reliable performance.

Length that impresses

With a length of 20 meters, this cable allows you to connect devices at the edge of your office. This is **ideal for large installations** where distance is crucial. With this length, you have complete freedom to deploy equipment without compromising on power.
