Full product description

Offering exceptional reliability and performance, the Ubiquiti UACC-Cable-PT-5m cable is the perfect solution for powering your devices.

Designed with the highest standards of safety and durability in mind, this 5-meter long cable is designed to power Ubiquiti devices compliant with the Power TransPort standard. Thanks to its robust tin-plated copper construction, you can rest assured that your devices will be powered stably and safely, even over longer distances.

High performance and safety

The Ubiquiti UACC-Cable-PT-5m cable **is made of 12 AWG tinned copper**, which ensures excellent conductivity and minimal power loss. This makes the cable ideal for powering devices with high power consumption. The VW-1 flammability rating provides an extra layer of safety, **protecting against fires and providing peace of mind** during use.

Durable and resistant construction

The jacket made of thermoplastic elastomer guarantees resistance to mechanical damage and extreme temperatures from -40 to 80°C. The cable is therefore ideal for both indoor and outdoor applications. Thanks to its robust construction, **the cable is resistant to harsh environmental conditions**, ensuring long-lasting and reliable performance.

Compact size and lightweight

The 5-meter cable offers flexibility and installation convenience, allowing **easy connection of power devices** at a greater distance from the power source. This makes it ideal for a variety of network configurations and installations. The white color of the cable makes it easy to integrate into different environments, keeping the installation aesthetically pleasing.
