Full product description

Performance and reliability of connection in your network

The Ubiquiti UACC-OFC-M2-LULU-0.5M is a half-meter OM4 patchcord that is designed for network systems based on Ubiquiti UniFi and Ubiquiti Networks solutions. Thanks to its LC duplex and low attenuation, it will be perfect for connecting switches, access points and other network devices.

Stability and performance of the connection

The Ubiquiti UACC-OFC-M2-LULU-0.5M offers bandwidth tailored for demanding network environments. Thanks to OM4 fiber, it supports 850/1300 nm transmission for fast and efficient communication between devices. In addition, the low attenuation of ≤ 0.3 dB ensures minimal signal loss even over longer distances.

Robust design and high durability

The patchcord is made of **LSZH (Low Smoke Zero Halogen)** material, which minimizes smoke and toxic emissions during a possible fire. With a diameter of 2 mm, the cable is flexible and easy to install, and its durability has been confirmed by testing for **1000 connection cycles**. This makes the cable meet the requirements in **advanced network systems**.
