Product features

Compatibility	U-Rack-6U-TL
Rack capacity	12U
Product colour	Silver
Watch case material	SPCC
Type	Stacking kit
Product weight	22489 g

Full product description

Stable and convenient connection of rack cabinets

The **Ubiquiti UACC-Rack-Stacking-Kit** is a **mounting accessory** that allows you to securely connect U-Rack-6U-TL cabinets into a stable structure. Thanks to **its tool-free mounting system**, installation is quick and convenient, saving time when organizing network infrastructure. This solution will work well in places where **efficient management of rack equipment** is required .

Hassle-free installation without tools

The **UACC-Rack-Stacking-Kit** is designed to be installed **without the need for tools**. This makes the installation of U-Rack-6U-TL cabinets quick and intuitive, and the eventual reorganization of equipment does not require dismantling the entire structure. This solution allows you to **easily add new components** as your network infrastructure grows.

Robust and durable construction

The accessory is made of **cold-rolled carbon steel** (SPCC), which provides it with **high load resistance** and stability of the entire structure. The painted surface increases durability, protecting it from mechanical damage and external influences. As a result, rack equipment remains **securely fastened**, even with frequent configuration changes.

Save space and be more organized with your equipment

Combining rack cabinets into a single design **eliminates the need for separate racks**, saving space in the server room or office. A tidier infrastructure means easier access to equipment, making maintenance and service easier. In addition, **an integrated handle and casters** allow the set to be moved conveniently when needed.

Compatibility with U-Rack-6U-TL cabinets

The **UACC-Rack-Stacking-Kit** is designed specifically to work with the Ubiquiti U-Rack-6U-TL, ensuring full compatibility. As a result, users **do not need to fit additional components**, and installation is quick and convenient. This is a solution for those who want to **organize their network infrastructure efficiently**.
