Full product description

UAP-AC-IW UniFi - access point for wall mounting, set of 5 pieces

Ubiquiti UniFi AC In-Wall is a set of five access points. It transforms the Ethernet connection into a dual-band **802.11AC** Wi-Fi access point. It has two Gigabit Ethernet ports, one of which provides PoE power and connects an 802.3af device to the network. UniFi AC In Wall AP supports 2x2 MIMO dual band technology. We recommend powering the UniFi AC In Wall AP with the UniFi PoE Switch because PoE adapters are not included in the In-Wall sets (no power supplies in 1-packs and 5-packs). The device belongs to the series of Ubiquiti products, which are used to **build and expand the wireless network Wi-Fi**.

A revolutionary WiFi system - UniFi from Ubiquiti

UniFi is a powerful, scalable Wi-Fi system with a central controller that allows you to manage all devices on your network. **Access Pointy UniFi AC In-Wall** is distinguished by its sophisticated design. Simple and quick installation is facilitated by the included mounting kit. The UniFi controller can be accessed via any web browser. It is a powerful tool to manage the entire network of UniFi devices from one place. The software is very intuitive, no special training is required.

Mobile UniFi® Controller application for Android and iOS

- Manage your UniFi devices with your smartphone or tablet using the dedicated mobile app
- Download the application and set up the device in less than 60 seconds
- Easily track the use of devices, clients and data
- Observe the state of network security through continuous reporting

Unlimited scalability with UniFi devices
