Price: **362.75 zł** gross / 294.92 zł net

Manufacturer: UBIQUITI

Referention number: DNXXEIOMLRMMMJ

Product features

Regulatory Approvals	CE, FCC, IC
Height	31.45 mm
Antenna type	Internal
Width	160 mm
Depth	160 mm
Security algorithms	AES
Wi-Fi Multimedia (WMM)/(WME)	Yes
Mounting kit	Yes
Input current	0.5 A
Maximum data transfer rate	1317 Mb/s
Power consumption (max)	6.5 W
Humidity measurement range	5 - 95%
Harmonized System (HS) code	85176990
Networking standards	IEEE 802.11a
Ethernet LAN (RJ-45) ports	1
Antenna gain level (max)	3 gain
Operating temperature (T-T)	-10 - 70 °C
Cabling technology	10/100/1000Base-T(X)
Quality of Service (QoS) support	Yes
VLAN support	Yes
Reset button	Yes
Dynamic Frequency Selection (DFS)	Yes

Maximum outdoor range	122 m
Power over Ethernet (PoE)	Yes
MIMO type	Multi User MIMO
MIMO	Yes
PoE adapter included	Yes
Placement	Ceiling
AC input voltage	24 V
Antennas quantity	2
Antenna features	Integrated antenna
Product colour	White
Maximum data transfer rate (5 GHz)	867 Mb/s
Maximum data transfer rate (2.4 GHz)	450
5 GHz	Yes
2.4 GHz	Yes
Product weight	170 g

Full product description

Scalable Wi-Fi1 Management System

Ubiquiti Access Point is an excellent **access point** that is part of the UniFi system. It works in 2.4Ghz and 5Ghz (Dual Band) frequencies. This access point is perfect for use in an office network, hotel, home, campus or public networks. UniFi is a **revolutionary Wi-Fi** system that stands out for its high performance, unlimited scalability and central controller to manage all devices on the network. Access Points UniFi AC Lite have a sophisticated design. They are easy to install with the included mounting kit. The UniFi OS Console can be accessed using any web browser. It is a powerful tool to manage the entire network made up of UniFi devices from one place. The software is very intuitive, no special training is required. UniFi OS Console has features such as: coverage map, performance parameters, real-time device status checking, automatic UAP device detection and advanced security options.

Save time and money

Unlike Wi-Fi systems from traditional companies that use a hardware controller, UniFi uses a dedicated controller that can be deployed on any computer or a dedicated UniFi Cloud Key.

The most important features:

- Solutions that save money and time. Unlike traditional corporate Wi-Fi systems that use a hardware controller, UniFi access points come with a dedicated controller that can be deployed on your company's computer. The computer can work in a Mac or Linux environment (private cloud or public cloud).
- Powerful 802.11ac Dual-radio UniFi Hardware, access points with the latest 802.11ac MIMO Wi-Fi technology
- Intuitive UniFi OS Console Software, easy to configure and manage with an easy to learn user interface
- Expandability, unlimited scalability: building small and large wireless networks has never been so easy. Start with one device and expand to thousands of devices with a single management system

Expandable

Unlimited scalability: building wireless networks has never been so easy. Start with a single UAP device and expand your network to as many as a thousand devices with one management system.
