## Full product description

### UAP-AC-LITE-5 UNIFI Access Point- set of 5 Ubiquiti access points

**UAP-AC-LITE-5 UNIFI Access Point** is a set of functional and easy to install access points for building WiFi networks. These access points work in two frequency ranges: 2.4 GHz and 5 GHz. The signal range up to 122 meters. It is an ideal set for **building or expanding wireless networks** in any type of buildings, such as: dormitories, residential buildings or hotels. This model has a small, lightweight housing and simple, modern design, characteristic for devices from the UniFi series.

**The price applies to a 5-piece package. The 5-pack does not include PoE adapters.**

### Features:

- Save money and time. Unlike traditional corporate Wi-Fi systems that use a hardware controller, UniFi comes with a dedicated controller that can be deployed on your computer on site. The computer can run in a Mac or Linux environment (private cloud or public cloud).
- Powerful 802.11ac Dual-radio UniFi Hardware, access points with the latest 802.11ac MIMO Wi-Fi technology
- Intuitive UniFi Controller Software, easy to configure and manage with an easy to learn user interface

### Expandable

Unlimited scalability: building wireless networks has never been so easy. Start with one UAP device and expand your network to up to a thousand devices with one management system.

## Scalable Wi-Fi network management system

UniFi is a revolutionary **Wi-Fi** system that stands out for its high performance, unlimited scalability and central controller to manage all devices in the network. **UniFi AC Lite** Access Points have a sophisticated design and can be easily mounted with the included mounting kit. The UniFi controller can be accessed via any web browser. It is a powerful tool to manage the entire network built with UniFi devices from one place. The software is very intuitive, no special training is required.

## Save time and money

Unlike traditional company **Wi-Fi** systems that use a hardware controller, the **UniFi** system uses a dedicated controller that can be deployed on any computer or use a dedicated **UniFi Cloud Key** device.

### **UniFi OS Console has features such as**

- Range coverage map
- Performance parameters
- Real-time device status
- Automatic detection of UAP devices
- Advanced security options
