### Product features

|                                    |             |
|------------------------------------|-------------|
| Regulatory Approvals               | CE, FCC, IC |
| Height                             | 43.2 mm     |
| Width                              | 175.7 mm    |
| Depth                              | 175.7 mm    |
| Security algorithms                | AES         |
| Mounting kit                       | Yes         |
| Input current                      | 0.5 A       |
| Maximum data transfer rate         | 1000 Mb/s   |
| Power consumption (max)            | 6.5 W       |
| Humidity measurement range         | 5 - 95%     |
| Harmonized System (HS) code        | 85176990    |
| Ethernet LAN (RJ-45) ports         | 1           |
| Antenna gain level (max)           | 3 gain      |
| Operating temperature (T-T)        | -10 - 70 °C |
| Reset button                       | Yes         |
| Maximum indoor range               | 183 m       |
| AC input voltage                   | 24 V        |
| Antennas quantity                  | 1           |
| Product colour                     | White       |
| Maximum data transfer rate (5 GHz) | 867 Mb/s    |
| Internal                           | No          |
| 5 GHz                              | Yes         |

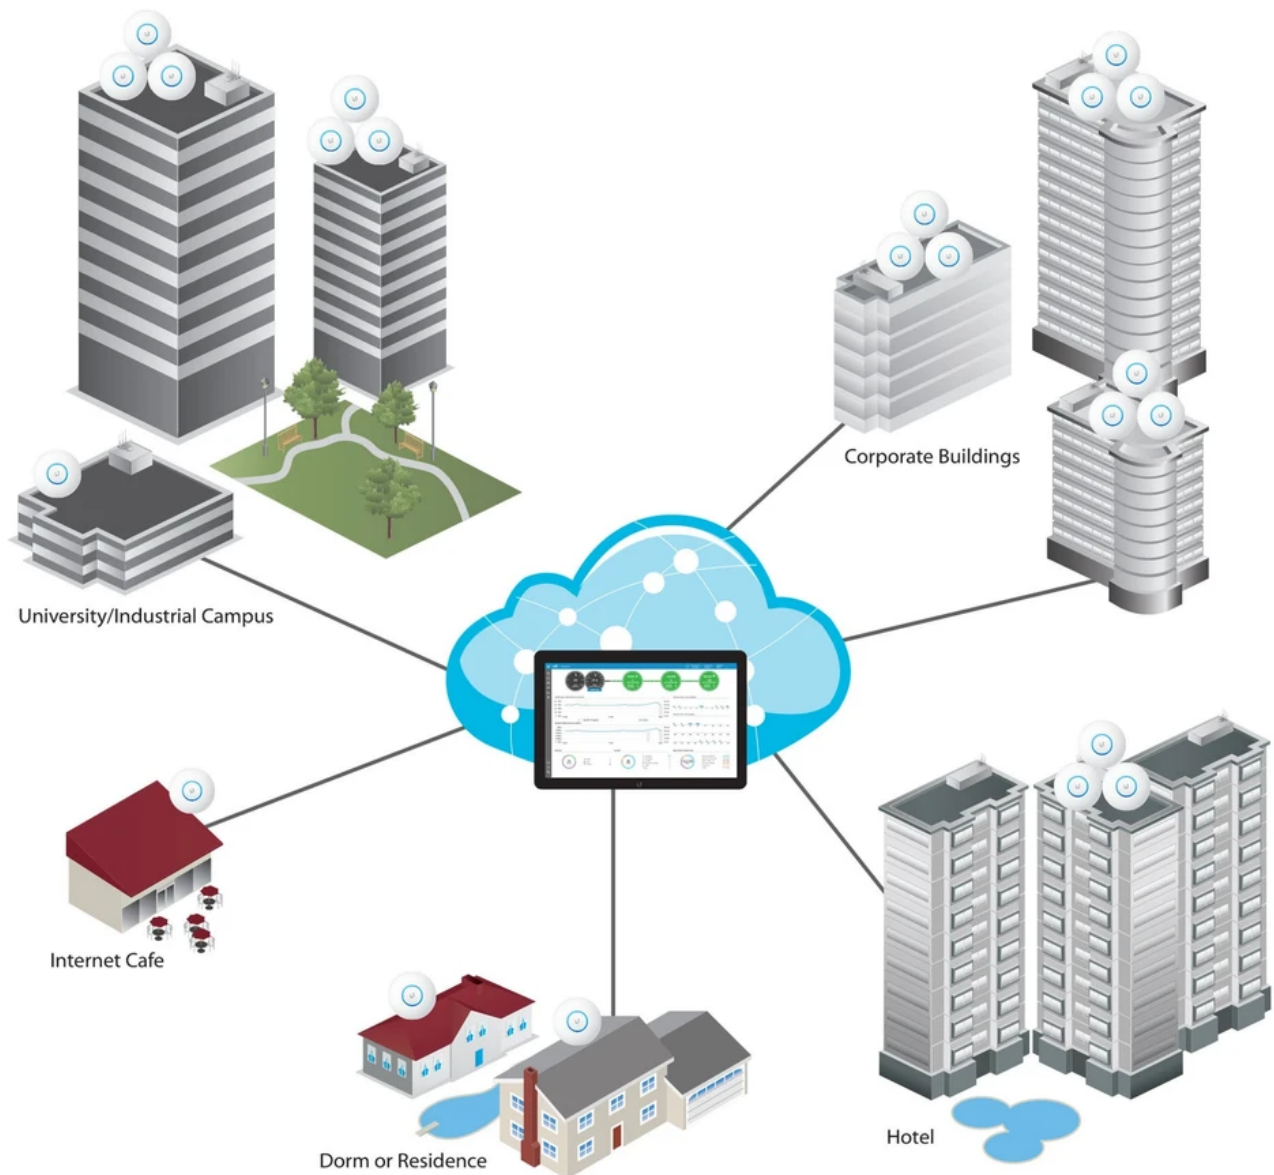

|                |       |
|----------------|-------|
| 2.4 GHz        | Yes   |
| Product weight | 240 g |

## Full product description

### Ubiquiti UniFi - internal access point of the Long Range series - contains 5 pieces per package

Ubiquiti UniFi UAP-AC-LR is an indoor **access point** operating in UniFi system. Small, compact, easy to mount on the wall, ceiling and other places. It is very easy to expand your network with further access points. UniFi OS Console software is intuitive, so you can easily configure and manage your network from one control panel. It works in the **2,4GHz and 5GHz** band, supports **802.11 a/b/g/n/a/c** standards and the transmission range is up to 180 meters. Thanks to its construction the antenna provides high transmission quality and higher gain of the 3dBi antenna. It works in MIMO technology providing greater connection stability and effective range, which is particularly important at 5GHz.

**Access Point UAP-AC-LR** is ideal for building WiFi networks in shopping malls, university campuses, office buildings and housing estates.

### UniFi - the perfect system for building and managing WiFi networks

UniFi is a revolutionary Wi-Fi system that stands out with its high performance, unlimited scalability and a central controller to manage all devices on the network. The AC LR Access Points have a sophisticated design and can be easily installed with the included mounting kit. The UniFi OS Console can be accessed via any web browser. It is a powerful tool to manage the entire network of UniFi devices from one place. The software is very intuitive and requires no special training. UniFi OS Console has features such as: coverage map, performance parameters, real-time device status, automatic UAP device detection and advanced security options.

## **Extendable with new access points**

Unlimited scalability: building wireless networks has never been so easy. Start with one UAP device and expand your network to up to a thousand devices with one management system.
