Price: **1,995.86 zł** gross / 1,622.65 zł net

Manufacturer: UBIQUITI

Referention number: DNFXFMJPMERMMKN

Product features

Regulatory Approvals	CE, FCC, IC
Height	353 mm
Width	46 mm
Depth	34.4 mm
Security algorithms	WEP
Wi-Fi Multimedia (WMM)/(WME)	Yes
Power management	24 W
Maximum data transfer rate	867 Mb/s
Power consumption (typical)	8.5 W
Humidity measurement range	5 - 95%
Harmonized System (HS) code	85176990
Networking standards	IEEE 802.11a
Ethernet LAN (RJ-45) ports	1
Antenna gain level (max)	4 gain
Operating temperature (T-T)	-30 - 70 °C
Quality of Service (QoS) support	Yes
VLAN support	Yes
Power over Ethernet (PoE)	Yes
MIMO	Yes
Placement	Wall
Antennas quantity	2
Antenna features	Detachable antenna

Product colour	White
Internal	No
5 GHz	Yes
2.4 GHz	Yes
Product weight	152 g

Full product description

UAP-AC-M-5 - the ideal set for building Mesh WiFi networks

UniFi UAP-AC Mesh belongs to the UniFi system created by Ubiquiti to easily build WiFi access anywhere you want. Its minimalist design is inconspicuous, but it conceals endless possibilities of Mesh network expansion within UniFi. The advantage is easy installation inside and outside of buildings. This set of access points is perfect for **creating a wireless Mesh** network in public places. The Wireless Uplink function enables wireless connectivity between access points in an extended range. One UniFi AP uplink (connected by cable) supports up to 4 wireless downlink connections on a single operating band, allowing you to receive devices wirelessly in their default state and make changes to the network topology in real time. For devices that support Plug & Play Mesh, this feature is extended to allow multiple wireless uploads.

Mesh Multi-Hop

The device works in a Multi-Hop network, which increases transmission speed. You can easily build wireless network infrastructure in public places using **UniFi UAP-AC Mesh** series devices.

Omnidirectional range (outdoor/indoor)

The UniFi AC Mesh AP has adjustable dual-band omni antennas, as well as the ability to use any 5 GHz omni antenna to provide coverage in densely populated areas with numerous access points and clients, such as a conference room.
