Full product description

The perfect Ubiquiti access point for building Mesh WiFi networks

UniFi AC Mesh PRO works in 802.11AC Wi-Fi standard in combination with Mesh Plug & Play technology. This access point can work simultaneously in the 5Ghz and 2.4Ghz bands, thanks to high power dual-band antennas. It works in 3x3 MIMO technology. The UniFi AC Mesh AP Pro has been designed to withstand harsh weather conditions, making it **ideal for outdoor applications**. The included brackets allow for easy installation - wall, ceiling, post. Five-pack gives the possibility to build **WiFi Mesh** network in a place that requires access to the wireless network.

UniFi makes it easy to build a Mesh WiFi network wherever you want it

UniFi is a revolutionary **Wi-Fi** system, which stands out for its high performance, unlimited scalability and central controller, allowing you to manage all devices on the network. The UniFi AC Mesh Access Points have a sophisticated design and can be easily mounted with the included mounting kit. The UniFi OS Console can be accessed via any web browser. It is a powerful tool for **managing the entire network made up of UniFi devices from a single location**. The software is very intuitive, no special training is required.

A long range. Easy to mount.

Built-in omnidirectional dual-band antennas increase the wireless range. The brackets included in the kit allow to mount the access point in many places: wall, ceiling, post.

Two Gigabit Ethernet ports and multiple power options

The first port is used for data transfer and PoE power. The second port is used to transfer data to the next device. The UniFi AC Mesh Pro can be powered by an 802.3af compliant PoE Unifi Switch or the included Gigabit PoE adapter.
