Full product description

The perfect Ubiquiti access point for building Mesh WiFi networks

UniFi AC Mesh PRO works in 802.11AC Wi-Fi standard combined with Mesh Plug & Play technology. Thanks to dual-band antennas, the access point can work simultaneously in the 5Ghz and 2.4Ghz bands. It works in 3x3 MIMO technology. The UniFi AC Mesh AP Pro has been designed to withstand harsh weather conditions, so **it is ideal for outdoor applications**. The brackets included in the kit allow for easy installation - wall, ceiling, pole. The five-pack gives the possibility to build a **WiFi Mesh** network in a place that requires access to wireless network. The price applies to a 5-pack. The 5-pack does not include PoE adapters.

UniFi allows you to easily build an efficient Mesh WiFi network

UniFi is a revolutionary **Wi-Fi** system that stands out for high performance, unlimited scalability and a central controller - allowing you to manage all the devices on your network. Access Points UniFi AC Mesh has a sophisticated design. They can also be easily attached with the included mounting kit. The UniFi OS Console can be accessed via any web browser. It is a powerful tool for **managing the entire network made up of UniFi devices from a single location**. The software is very intuitive and does not require special training.

Long antenna range

Built-in omnidirectional dual-band antennas increase the wireless range.

Two Gigabit Ethernet ports and multiple power options

The first port is used for data transfer and PoE power. The second port is used to transfer data to the next device. The UniFi AC Mesh Pro can be powered by the 802.3af-compliant Unifi Switch PoE or the included Gigabit PoE adapter.
