Full product description

Remotely manage the UCK-G2-Plus Cloud Controller

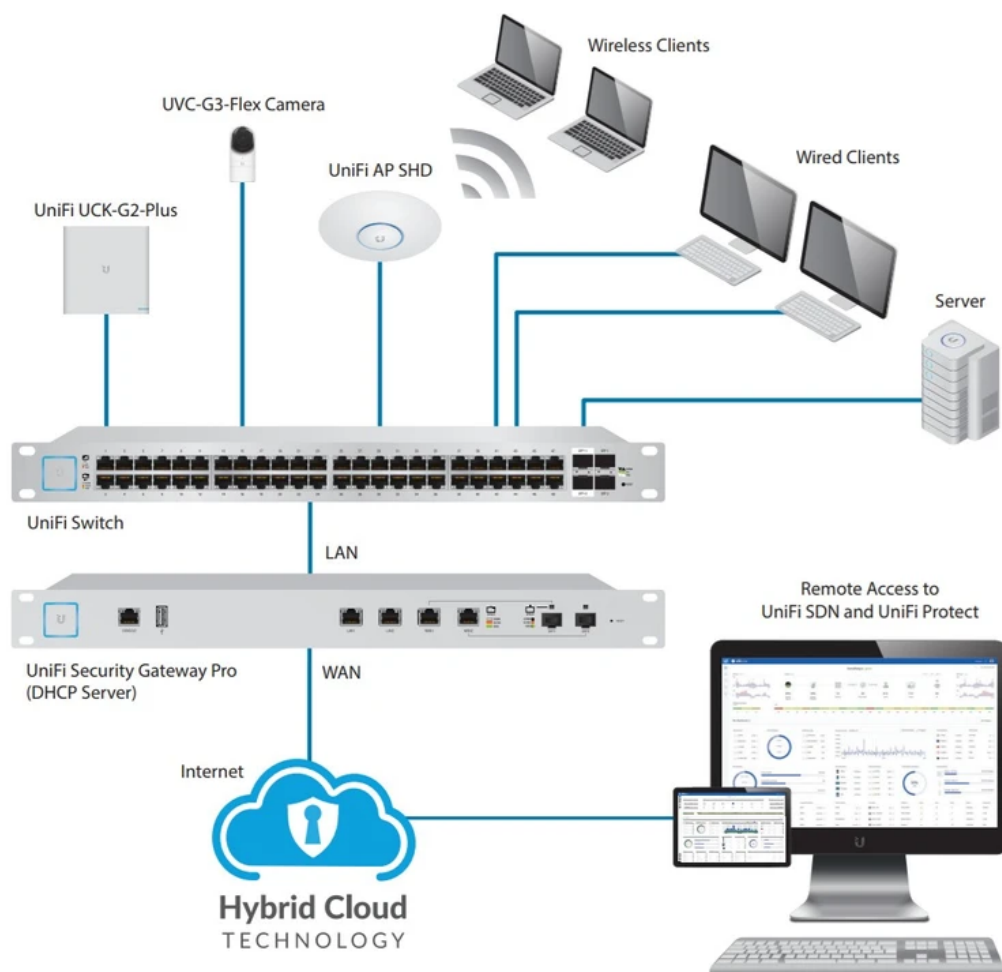

UniFi Cloud Key Gen2 Plus is an integrated hardware controller and independent **application server**, which is designed to manage and monitor UniFi network devices and camera surveillance system. It has an eight-core processor with 3 GB of RAM, 1 TB of SATA hard drive for video storage and 32 GB of eMMC flash storage. It uses the latest version of the UniFi controller with hybrid cloud technology.

Breakthrough efficiency

UniFi Cloud Key Gen2 Plus has the full ability to configure and manage **thousands of UniFi** devices in your network. It offers an alternative in the form of energy-saving PoE for a dedicated server or computer, practically without taking up space in the digital network.

UniFi SDN System

Hybrid Cloud technology

The **hybrid cloud configuration** Ubiquiti® provides a secure, private SSO (Single Sign-On) login that allows access to all your UniFi deployments from anywhere in the world. With Ubiquiti's Hybrid Cloud, no third party cloud service is required, so all your personal and network information remains local and secure.

Incredible scalability

Add, deliver, configure, monitor and manage all your UniFi devices, both in one and hundreds of private networks, all through a centralised control panel. Easily accessible via one of the downloadable applications or a standard web browser (Chrome recommended), UniFi Cloud Key

Gen2 Plus is a powerful solution for managing UniFi networks from anywhere in the world.

UCK-G2 special features

- Includes UniFi Protect video surveillance software
- It has UniFi SDN network management software
- Easy configuration with UniFi and UniFi Protect mobile applications
- Powered by 802.3af PoE or QC 2.0 USB-C
- Built-in battery for automatic, safe shutdown
- 1 TB 2.5" hard drive included (upgradeable to 5 TB)
- Front panel display for quick access to system details
