Price: **1,153.24 zł** gross / 937.59 zł net

Manufacturer: UBIQUITI

Referention number: DNXXHILMHRMMHP

Information:

Ubiquiti UCK-G2-SSD is an advanced hardware UniFi controller with a 1 TB SSD, designed for central management of the network and UniFi devices such as access points, switches and gateways. It supports UniFi Protect, so it can also serve as a video surveillance server. It offers PoE or USB-C power, a built-in battery protecting against power loss, 3 GB RAM and 32 GB eMMC for stable operation. Bluetooth, automatic detection and the UniFi app and browser make quick configuration easy, while the OLED display allows you to monitor the device status in real time.

Product features

Height	27.1 mm
LED indicators	Power
Width	131.2 mm
Depth	134.2 mm
Input current	2 A
Compliance certificates	CE
Power consumption (max)	9.6 W
Humidity measurement range	20 - 80%
Harmonized System (HS) code	85176990
Ethernet LAN (RJ-45) ports	1
Flash memory	32000 MB
Processor family	ARM Cortex
DC input voltage	9 V
Operating temperature (T-T)	0 - 35 °C
Reset button	Yes

Card reader integrated	Yes
Display diagonal	1.42 "
Compatible memory cards	MicroSD (TransFlash)
Power over Ethernet (PoE)	Yes
SSD capacity	1000 GB
Internal memory	3000 MB
Bluetooth	Yes
Display type	OLED
Processor model	Cortex-A53
Processor manufacturer	ARM
Built-in processor	Yes
Product colour	Black
Mounting hardware type	Desktop/Rack mounting
Watch case material	Aluminium
Control panel	Yes
Product weight	560 g

Full product description

Advanced Unifi controller with 1TB SSD drive

The **Ubiquiti UCK-G2-SSD** is a **Unifi Cloud Key** hardware controller that integrates with Unifi **Controller** software to provide efficient configuration and management of Unifi devices. With a built-in **1TB SSD** and support for **Unifi Protect**, it can also serve as a video surveillance server.

Unifi Controller - full network management

The **UCK-G2-SSD** allows you to centrally manage your **Unifi network**, including access points, switches and network gateways. **Integration with Unifi SDN** enables monitoring, configuration and optimization of all devices from a single panel. With Ubiquiti, administrators can **easily configure and supervise** their network both locally and remotely.

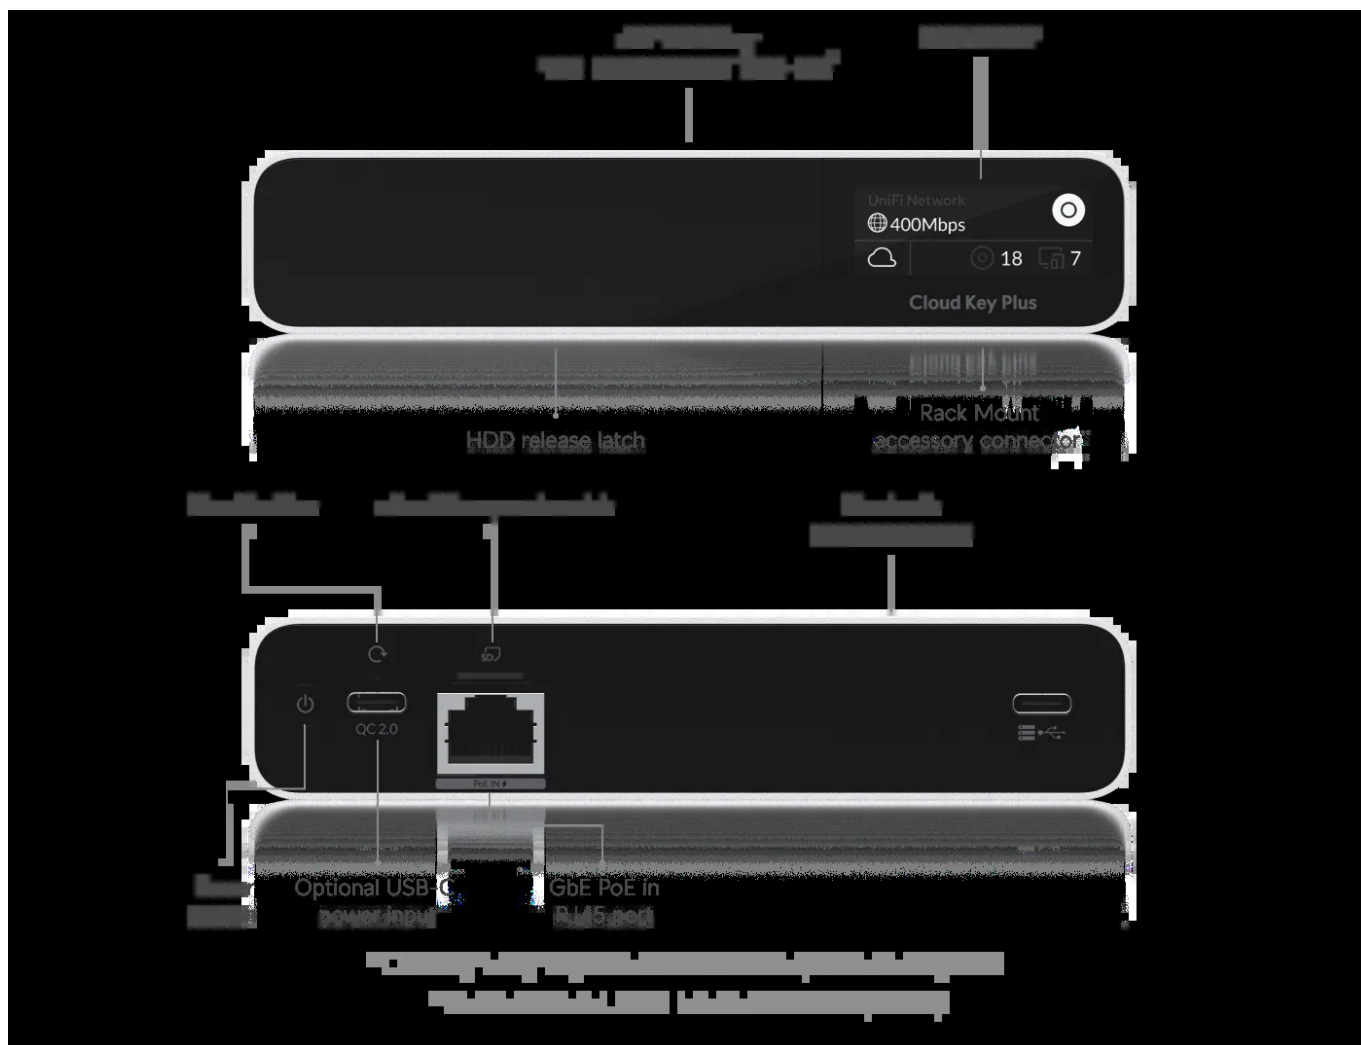

PoE and USB-C power - flexible configuration

The **UCK-G2-SSD** supports **PoE**, which allows the controller to be powered via the Ethernet port, eliminating the need for an additional power supply. Alternatively, a USB-C (**Quick Charge 2.0/3.0**) power supply can be connected, increasing mounting options. Thanks to the built-in battery, the device is protected against sudden shutdown in the event of a power outage.

SSD 1TB - fast and secure storage

The **UCK-G2-SSD** is equipped with a **1TB SSD** to store UniFi Protect camera recordings and network configuration data. Built-in **32GB eMMC** memory and **3GB RAM** guarantee stable operation even under heavier load. It only supports drives that can run on **5V power** for greater reliability.

Bluetooth and quick setup in the UniFi app

With **built-in Bluetooth**, configuration of the **UCK-G2-SSD** is quick and intuitive. The **UniFi Controller system** automatically detects the device, allowing instant management via the UniFi mobile app or web browser. An integrated **OLED display** allows you to monitor device and connection status in real time.
