Information:

Ubiquiti UniFi Dream Machine Pro (UDM-Pro) is a versatile 1U rack-mount network device designed for small and medium-sized businesses. It combines a security gateway, UniFi controller, 8-port Gigabit switch and 10G SFP+ WAN link, providing efficient and easy-to-manage infrastructure. It offers advanced network protection features such as IPS/IDS, DPI and AI Wi-Fi, as well as support for UniFi Protect NVR for video surveillance with the option to install a 3.5" drive. With dual WAN, LTE failover support and an option for redundant power supply, it increases network reliability.

Product features

Regulatory Approvals	CE, FCC, IC
Height	43.7 mm
LED indicators	Yes
Width	442.4 mm
Depth	285.6 mm
Rack mounting	Yes
Power consumption (max)	33 W
Harmonized System (HS) code	85176990
Switch type	Managed
10G support	Yes
Flash memory	16000 MB
DC input voltage	12 V
Performance	3.5 Gb/s
SFP+ module slots quantity	2
Processor frequency	1700 MHz

Power supply included	Yes
Internal memory	4096 MB
AC input frequency	50 Hz
AC input voltage	100 V
Processor model	ARM Cortex-A57
Built-in processor	Yes
Product colour	White
Number of power supply units	1
Basic switching RJ-45 Ethernet ports type	Gigabit Ethernet (10/100/1000)
Basic switching RJ-45 Ethernet ports quantity	9
Redundant power supply (RPS) support	Yes
Product weight	3900 g

Full product description

Switch - UBIQUITI UDM-PRO

UniFi Dream Machine Pro (UDM-Pro) is an all-in-one business network device. **UDM-Pro** integrates into all current and future UniFi controllers with a security gateway, **10G SFP+ WAN** network, 8-port Gbps switch and commercially available 3.5-inch hard drives.

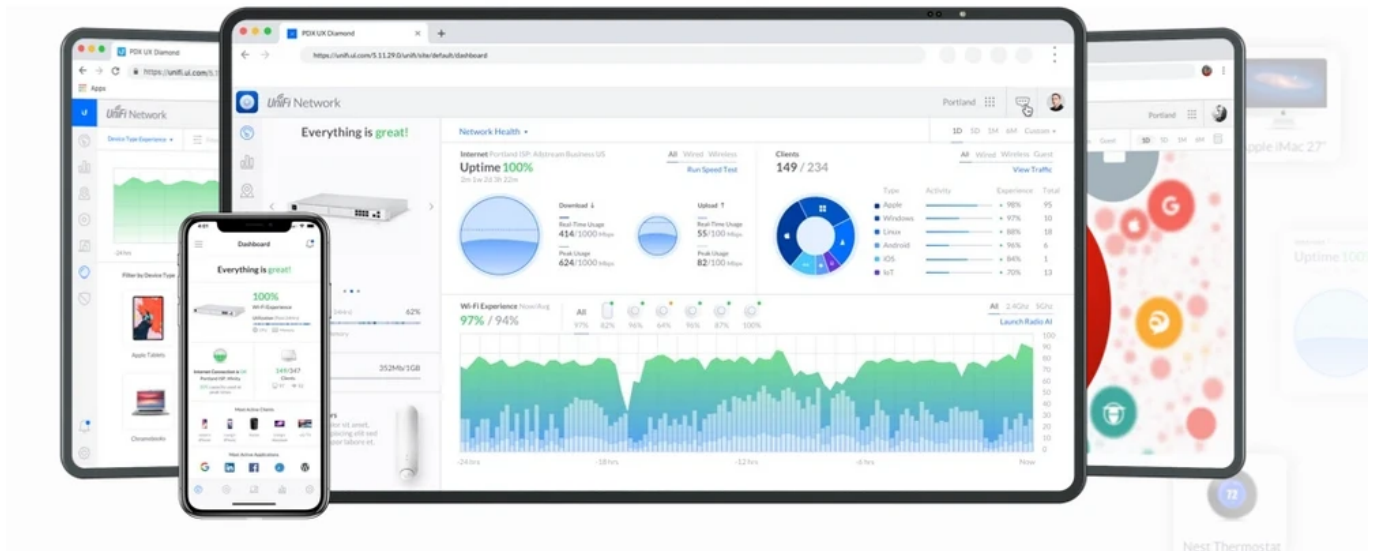

The most important features:

- Integrated 1U rack unit for small and medium-sized businesses
- Combines the new UniFi operating system with an 8-port switch and security gateway
- UniFi Protect NVR for video surveillance with ready to use HDD 3.5

- 8-port Gigabit switch with 1 Gbps RJ45 and 10G SFP + LAN
- Enterprise class IPS / IDS, DPI and AI Wi-Fi features
- Powered by a fast 1.7 GHz quad-core processor

Perfectly designed software

UDM Pro includes a UniFi OS Console to manage UniFi switches and access points. You can also run **UniFi Protect** software to conveniently monitor and fully manage your camera surveillance system. The video recordings are stored on the built-in **NVR** (hard drive not included) and can be easily accessed with the UniFi Protect mobile application. Remote access gives you safe viewing of recordings stored privately on UDM Pro and not on a third-party server.

UDM Pro supports multiple redundancy options to ensure even better network performance:

- Dual WAN with emergency switchover. Supports dual Internet/ISP connections with emergency switching: if the basic WAN connection fails, it will automatically switch to another WAN connection.
- LTE Emergency Switching Redundancy Supports the UniFi LTE device for automatic emergency switching to the LTE mobile network. If a wired WAN fails, it will automatically switch to UniFi LTE, keeping the network online.
- The UDM Pro supports our UPS emergency switching system. If the internal power supply fails, the proprietary USP RPS interface works to provide backup power.
