Price: **2,255.91 zł** gross / 1,834.07 zł net

Manufacturer: UBIQUITI

Referention number: DNXGGJKJRMGN

Product features

Height	43.7 mm
Input voltage	100 V
LED indicators	Activity
WAN connection	Ethernet (RJ-45)
Width	442.4 mm
Depth	285.6 mm
Power management	240 W
Input current	4.4 A
Power consumption (typical)	50 W
Humidity measurement range	5 - 95%
Harmonized System (HS) code	85176990
Touchscreen	Yes
Networking standards	IEEE 802.3af
Ethernet LAN (RJ-45) ports	8
Flash memory	16384 MB
Input frequency	50 Hz
Operating temperature (T-T)	-10 - 40 °C
Rack capacity	1U
Reset button	Yes
Processor frequency	1700 MHz
Display diagonal	1.3 "
Ethernet LAN data rates	1000 Mb/s

Power over Ethernet (PoE)	Yes
Internal memory	4096 MB
Bluetooth	Yes
Number of processors installed	1
Built-in processor	Yes
Product colour	Stainless steel
Internal memory type	DDR4
Mounting hardware type	Rack mounting
Watch case material	Aluminium
Control panel	Yes
Product weight	4950 g

Full product description

UniFi Dream Machine Special Edition (UDM-SE-EU): A Comprehensive Networking Solution for Your Business

The Ubiquiti UniFi Dream Machine Special Edition (UDM-SE) is a state-of-the-art **all-in-one business networking device** that combines a comprehensive router, security gateway, integrated PoE switch and network video recorder. Ideal for homeowners and businesses alike, the **UDM-SE** enables seamless network scaling and management with advanced dual WAN connectivity (10G SFP and 2.5Gbps RJ45), a Gigabit PoE switch and a built-in video recorder with 128GB of internal storage.

Advanced Features and Full Control with UniFi OS

The UniFi Dream Machine SE runs on UniFi OS, which provides full control over all UniFi devices, including access points, Protect cameras, Talk phones and Access readers. The console is future-proof and will be able to support all upcoming UniFi OS applications. The UDM-SE is designed with end-to-end simplicity in mind, and the integrated Bluetooth radio streamlines the initial setup process, which can be done in minutes using the UniFi Network app.

Comprehensive Network Management and Monitoring

The **UniFi Dream Machine SE** includes a UniFi network controller, so it can manage UniFi switches and access points. The device lets you run UniFi Protect software to monitor and fully manage your camera surveillance system. Video recordings are stored on the built-in NVR, allowing them to be easily accessed using the UniFi Protect mobile app. Remote access provides secure viewing of recordings stored privately on the **UDM Special Edition**, rather than on a third-party server.

Advanced Redundancy and Security Options

UDM Special Edition supports multiple redundancy options to ensure reliable network operation:

1. **Dual WAN with failover:** Supports dual Internet/ISP connections with failover, which automatically switches to another WAN connection in the event of a failure.
2. **LTE failover redundancy:** Supports UniFi LTE device to automatically failover to LTE mobile network when wired WAN fails.
3. **Power Supply Failover System:** If the internal power supply fails, the USP RPS interface provides backup power, creating an uninterruptible network.
