Referention number: DNXXGFMJRMNGM

Information:

Ubiquiti UNVR is a network video recorder for businesses that combines UniFi Protect, 4 drive bays and simple Plug-and-Play setup. It enables storage of up to 30 days of 4K recordings from 15 cameras or Full HD recordings from 50 cameras, especially in a RAID 5 configuration with four 8 TB drives. Thanks to the intuitive interface, you can remotely view cameras and recordings from a computer or a mobile device with iOS and Android. The device offers 1U rack mounting, a 10G SFP+ port, a Gigabit RJ-45 port, RAID 1/5 support and USP-RPS for backup power.

Product features

Height	43.7 mm
Width	442.4 mm
Depth	325 mm
Power consumption (max)	100 W
Power consumption (typical)	75 W
Processor frequency	1.7 GHz
Output current	2 A
AC input frequency	50 Hz
AC input voltage	100 V
HDD 2 capacity	4 GB
Product weight	5110 g

Full product description

UniFi Protect Network Video Recorder

Ubiquiti UNVR is a business-grade network video recorder that can provide **up to 30 days of video storage** 4k for 15 cameras or FULL HD

video storage for 50 cameras.

Intuitive operation

Ubiquiti UNVR is designed for video recording in corporate networks, **the device integrates NVR, UniFi Protect software and 4 disk slots.** It combines enterprise-class data protection and scalable storage with simple plug and play integration using the intuitive UniFi Protect software. **The device is equipped with an intuitive graphical user interface**, which allows you to access the surveillance footage from your desktop or mobile device from anywhere, the application itself is available on iOS and Android devices.

Quick and easy HDD installation

The disk slots are located on the front panel of the device, **making the installation and maintenance of hard drives easy and fast.** Using four 8TB drives in RAID 5 configuration, UNVR can provide up to 30 days of 4k video storage for 15 cameras or Full HD video storage for 50 cameras.

Versatile UniFi OS Console software

The UniFi OS Console enables you to manage the UNVR, as well as browse recorded video and view connected cameras in real time. It can also manage thousands of UniFi access points, map networks, quickly manage traffic in the system and add new UniFi access points. Take advantage of the UniFi OS Console features to find and eliminate interference, analyse radio frequencies, find the optimal spot for an access point and configure it.

Main features

- 4 HDD bays - 2.5"/3.5"
- 1 x 10G SFP+ port
- 1U-sized, rack-mountable console (kit included)
- Pre-installed UniFi Protect system
- Automated RAID 1 or RAID 5 configuration
- 1 x GbE RJ45 port
- Can be connected to the USP RPS (sold separately) for enhanced power supply failover protection
