Full product description

Ubiquiti UNVR-Instant - Professional video recorder

The Ubiquiti UNVR-Instant is a **network video recorder (NVR)** that provides efficient management and storage of UniFi Protect camera recordings. The device is designed with performance, flexibility and security in mind, enabling it to support up to **15 cameras** simultaneously, including **Full HD** and **4K** cameras. With support for PoE (Power over Ethernet), the UNVR-Instant allows for easy installation, eliminating the need for separate power supplies for cameras.

High performance and scalability

The Ubiquiti UNVR-Instant offers **support for up to 15 cameras**, including 8 **2K** cameras and 6 **4K** cameras for high-quality video recording. With **PoE** support, the device allows easy connection of cameras without the need for additional power cabling, simplifying installation. Thanks to these parameters, the UNVR-Instant will work well in large installations where **high quality monitoring** is required.

Support for various video formats

Ubiquiti's **UNVR-Instant DVR** supports **Full HD, 2K** and **4K cameras**, giving you the flexibility to choose the right devices depending on your needs. With support for 4K cameras, users can enjoy exceptional image quality in high-definition surveillance systems. **HDMI viewport** allows users to connect the device to a TV or monitor to view cameras in real time.

Convenient management and security

The Ubiquiti **UNVR-Instant** is compatible with UniFi Protect, allowing central management of cameras and storage of recordings. The ability to **store data** for up to 30 days and the option to configure **RAID 1** ensure the protection of stored material. In addition, the device supports **Bluetooth**, which allows easy configuration and monitoring of the system via a mobile or computer app.

Extensive functionality with PoE and mounting

With six **GbE PoE RJ45** ports, the UNVR-Instant can power cameras through a single Ethernet installation, greatly simplifying the installation process. The device supports **both wall and DIN-rail mounting**, giving you additional installation options depending on your space requirements. **Powering via PoE** with a budget of 40W allows the unit to power devices safely and efficiently, eliminating the need for additional power cables.
