Full product description

Ubiquiti Alarm Siren - A New Level of Security.

The Ubiquiti UP Siren PoE is a solution for those who want to increase security in private and corporate facilities without complicated installations. The model offers a powerful **110 dB** beep and bright **LED** light for immediate response to an alarm event. Simultaneous PoE support and UniFi integration make the siren simply work when you need it.

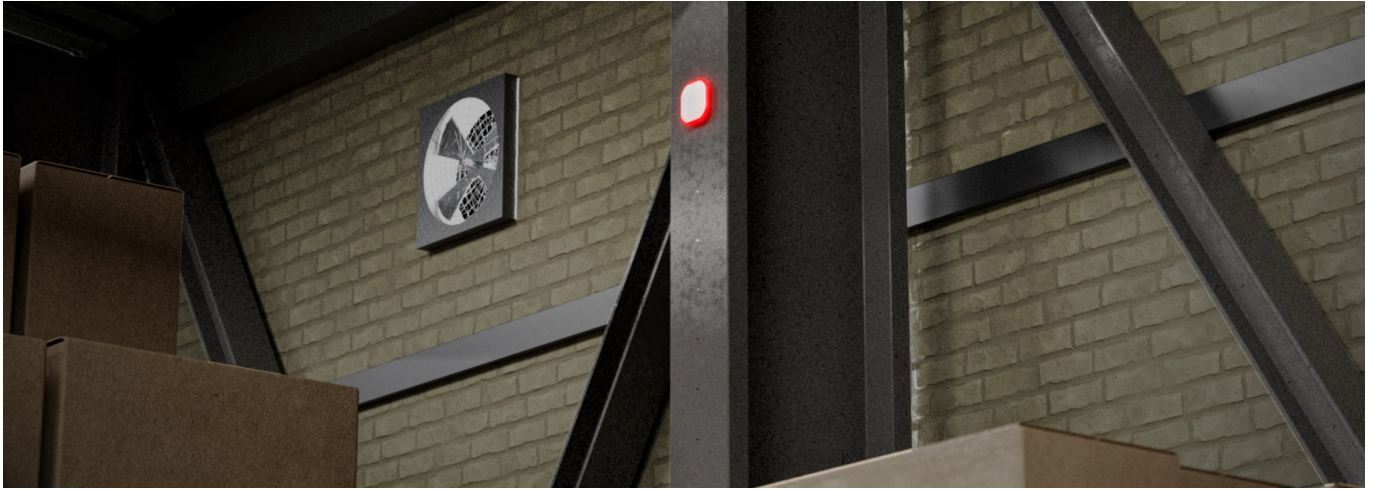

Emergency Visibility for Any Circumstances.

The device is equipped with multicolor **R/G/B/W LEDs** that create a very clear light signal. The **emergency LED lighting** function helps identify the threat even in very low light. The combination of light and sound improves the effectiveness of the alarm and increases the response of the environment.

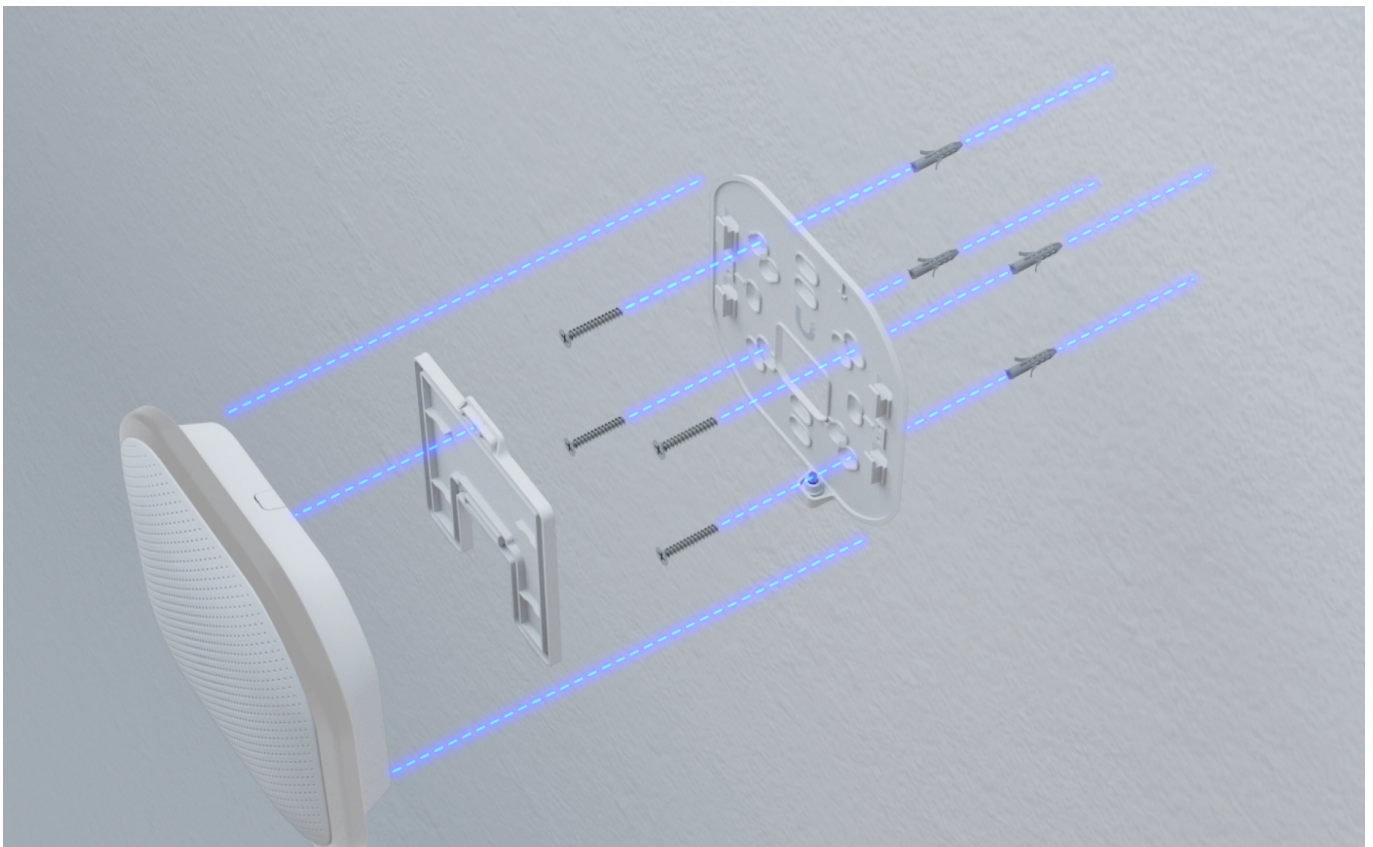

Feeling of Safety with Loud Alarm

The Ubiquiti UP Siren PoE generates a **110 dB** signal, which is loud enough to draw immediate attention in emergency situations. The sound is clear and dynamic, so it acts as a deterrent and informative at the same time. It is an equipment that raises the level of protection in any building

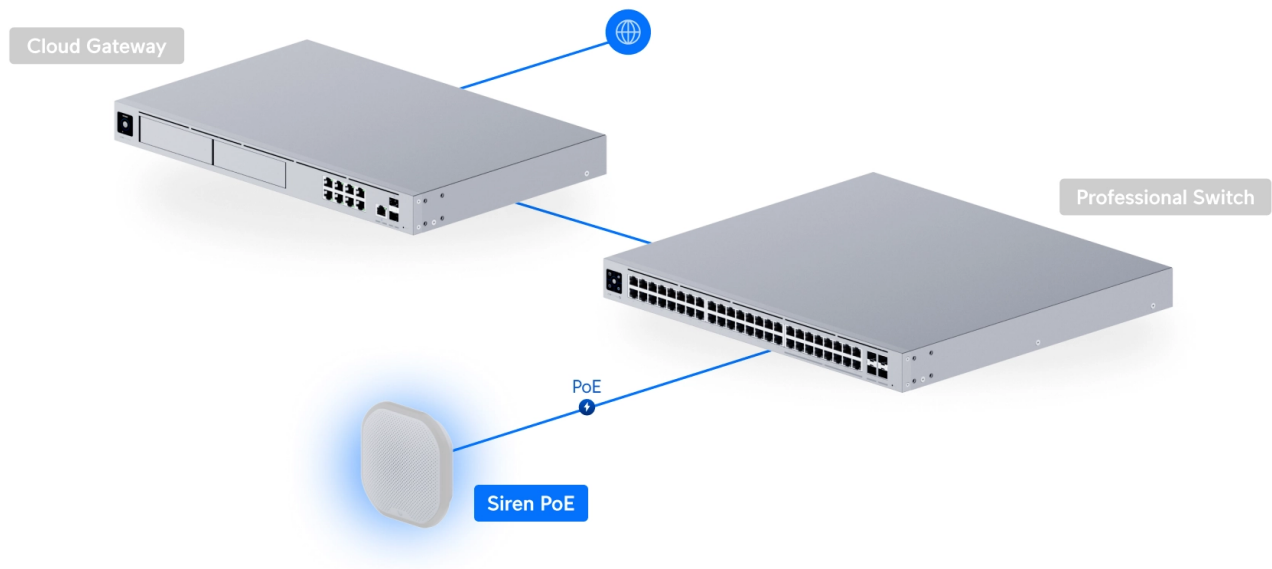

Siren Ready for Assembly in a Few Moments

The Ubiquiti UP Siren PoE is designed to make installation **quick and as easy as possible**. The components fit together **intuitively**, so the siren can be fixed without specialized tools. The clear layout of the mounts makes **the entire installation smooth even for beginners**, which is perfectly highlighted by the graphic shown.

PoE - Power and Communication in One Cable

The siren uses **PoE** (Power over Ethernet - power over Ethernet cable), so that one cable is responsible for both power and data transmission. This is a real simplification of installation in places where standard power sources are lacking. Connecting to any compatible **PoE switch** from the Ubiquiti Networks ecosystem makes installation quick and tidy.

Installation Facilitator Kit

The Ubiquiti UP Siren PoE comes with **a complete mounting kit**, so you install it without additional accessories. The box includes **a mounting plate** and screws that allow you to mount the device on the wall or ceiling. This is a quick and practical solution that saves time and simplifies system setup
