Full product description

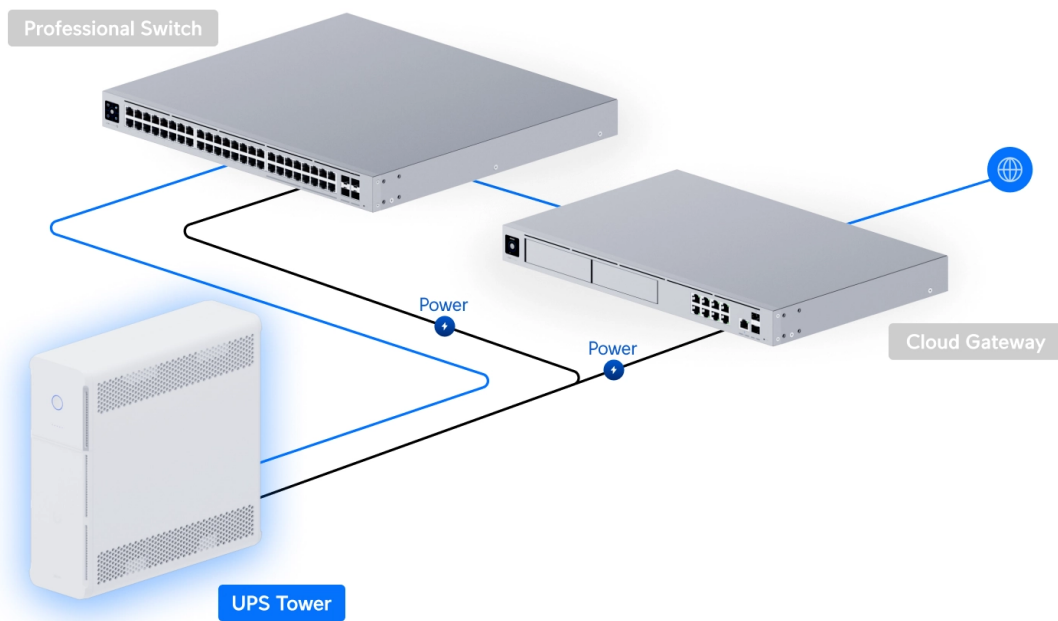

UPS-TOWER-EU UniFi 1 kVA power supply - Protect your equipment.

The Ubiquiti UPS-TOWER-EU UniFi 1 kVA uninterruptible power supply is a reliable solution that provides power stability for network devices. Thanks to the **line-interactive** technology used, the unit automatically adjusts the voltage, protecting against damage due to sudden power surges. **The power supply** is an excellent choice for those looking for reliable support in case of power failure in home and office **UniFi** systems.

Line-interactive technology

The **line-interactive technology** of the **UPS-TOWER-EU** ensures continuity of power supply, even in case of problems with the power grid. The unit automatically corrects the voltage between **170V and 280V** , which minimizes the risk of damage to equipment connected to **the power supply**. Thanks to this technology, the user gains confidence that his equipment is adequately protected

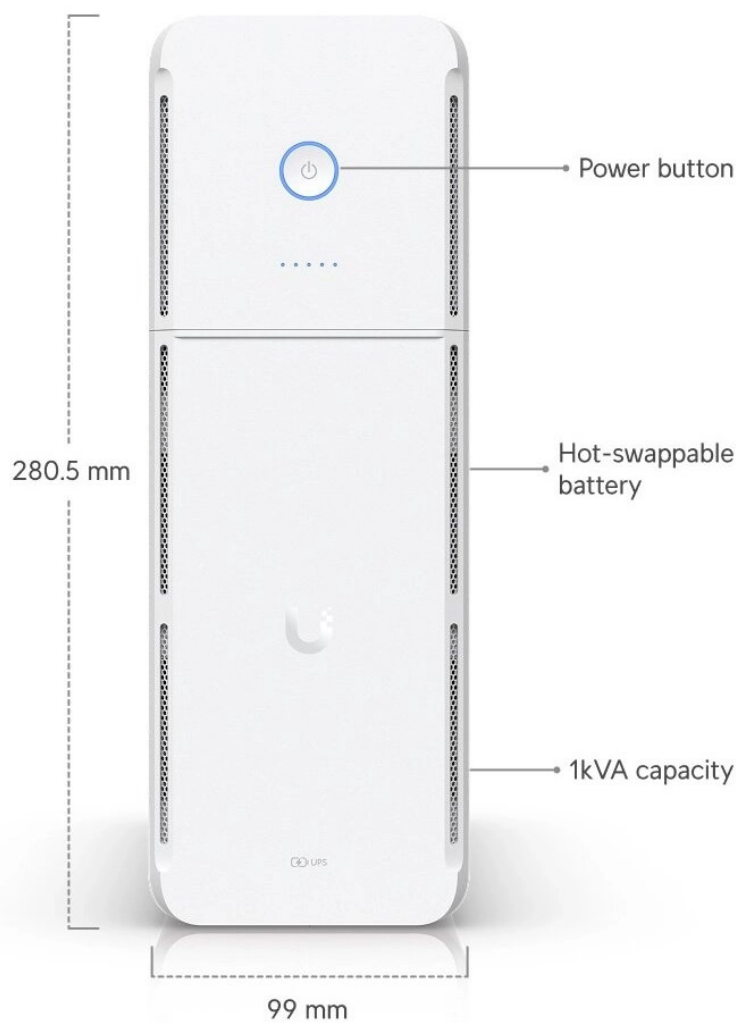

High power and capacity

The **1 kVA (600 W)** UPS-TOWER-EU is sufficient to power devices such as routers, switches and other network equipment. With a **9Ah battery** capacity, the unit provides up to **7 minutes of back-up time** at half load, giving you enough time to safely shut down your equipment. It also has the ability to operate in **battery** mode, which is crucial in the event of a power failure.

High number of network outlets

The UPS-TOWER-EU offers **10 power outlets**, including **5 battery-powered** and **5 surge-protected**. This allows the user to connect a variety of devices, providing them with protection against sudden power surges and power failures. **C13** and **C14** outlets are standard ports, making it easy to connect a wide range of devices

Replaceable battery

The UPS-TOWER-EU is equipped with a **lead-acid battery** that can be replaced when needed. The battery has a charging time of **6 to 8 hours** to recover up to 90% of its capacity. With this feature, the user can enjoy long-lasting and reliable operation without having to replace the unit when the battery is depleted.

Compact design and easy operation

The Ubiquiti UPS-TOWER-EU measures **288 x 99 x 280.5 mm**, making it compact enough to fit on a desk or in a server cabinet. The unit is also easy to use thanks to an **LED** panel that informs the user of the unit's status, **battery** level or whether service action is needed. In addition, it has an **Ethernet** port for managing the device over the network.
