### Full product description

### 10G aggregation switch for corporate networks

Build and expand your network using the **UniFi 16 XG** Ubiquiti switch, which is part of the UniFi Enterprise System. US-16-XG is a fully managed **16-port 10G** fiber-optic switch that increases network capacity with multiple switches in your network.

### Example of 10 Gbps implementation

The ability to switch traffic **US-16-XG** allows traffic to be handled simultaneously on all ports at the maximum possible speed without any loss. Total capacity without blocking up to **160 Gbps**.

### Multiple management

A single instance of a cloud-based UniFi OS Console can **manage multiple UniFi** sites within a centralized interface. Each site is **logically separated** and has its own network monitoring, configuration, maps, statistics and administrative accounts.

## High throughput 10G connections

US-16-XG offers **maximum performance and low latency** as an aggregation switch. It is equipped with **12 SFP+** ports to provide fiber optic connectivity. For CAT 6/5e cable connections, US-16-XG offers **four 10G RJ45** ports.

## Seamless integration

The UniFi switch integrates seamlessly into the network platform defined by the UniFi software, creating a highly scalable, comprehensive system of network devices in multiple locations that are controlled from a single interface.
