Full product description

Ubiquiti's manageable Gigabit Ethernet switch with 4 802.3af PoE ports - five units per package

Ubiquiti US-8-60W is a manageable gigabit switch with 4 PoE ports. Build and expand your network with the Ubiquiti UniFi® US-8-60W switches included in the UniFi product line. The new 8-port models are equipped with Gigabit Ethernet ports in a compact form. Switches are fully manageable, providing your network with high performance and intelligent switching. The package contains five pieces.

Special features

- 8 RJ45 Gigabit ports
- 4 IEEE 802.3af PoE ports with automatic detection
- Non-Blocking capacity 8 Gbps
- Switching capacity 16 Gbps
- Transfer rate 11.9 Mpps
- Maximum energy consumption 12 W
- Product available in Single-Pack and 5-Pack versions

US-8-60W switch - high switching capacity and throughput without blocking

The **UniFi switch US-8-60W** offers the bandwidth to process traffic on all ports in linear numbers simultaneously without losing packets. Each UniFi switch supports up to 8 Gbps with the ability to switch up to 16 Gbps without blocking the bandwidth.

Support for PoE 802.3af with automatic detection

The US-8-60W is powered by the included power supply. Four PoE ports with automatic detection provide up to 15.4 W per port.
