Full product description

Redundant Power Supply System

Ubiquiti USP-RPS is a redundant **UniFi® SmartPower** power supply system, a proprietary power supply system designed to protect up to six devices supported by UniFi SmartPower from a sudden power failure. **USP-RPS** continuously monitors all connected devices. In the event of an internal AC or DC power failure, emergency switching takes place automatically so that the network runs smoothly. Thanks to its high power **950W DC**, the USP-RPS can protect various devices that need high power, including **UniFi PoE** switches.

1.3-inch LCM

The integrated **1.3-inch LCM** colour touch screen displays relevant system information for fast and convenient monitoring.

The most important features:

- 6x DC USP output ports
- 1x Ethernet port
- Rack mount bracket
- Display 1.3 "with touch screen and device status information
- Managed by UniFi Network Controller version: 5.12.11 or higher

UniFi[®] CONTROLLER
