### Product features

|                                                |                                |
|------------------------------------------------|--------------------------------|
| LED indicators                                 | Yes                            |
| Wall mountable                                 | Yes                            |
| Rack mounting                                  | No                             |
| Humidity measurement range                     | 10 - 90%                       |
| Harmonized System (HS) code                    | 85176990                       |
| Networking standards                           | IEEE 802.3at                   |
| Switch type                                    | Managed                        |
| 10G support                                    | No                             |
| Operating temperature (T-T)                    | -15 °C to 40 °C                |
| Power supply included                          | Yes                            |
| Power over Ethernet (PoE)                      | Yes                            |
| Power over Ethernet plus (PoE+) ports quantity | 4                              |
| Power over Ethernet (PoE) type supported       | PoE+                           |
| Product colour                                 | White                          |
| Power connector                                | DC-in jack                     |
| Switch layer                                   | L2+                            |
| Number of power supply units                   | 1                              |
| Basic switching RJ-45 Ethernet ports type      | Gigabit Ethernet (10/100/1000) |
| Basic switching RJ-45 Ethernet ports quantity  | 8                              |
| Stackable                                      | No                             |

## Full product description

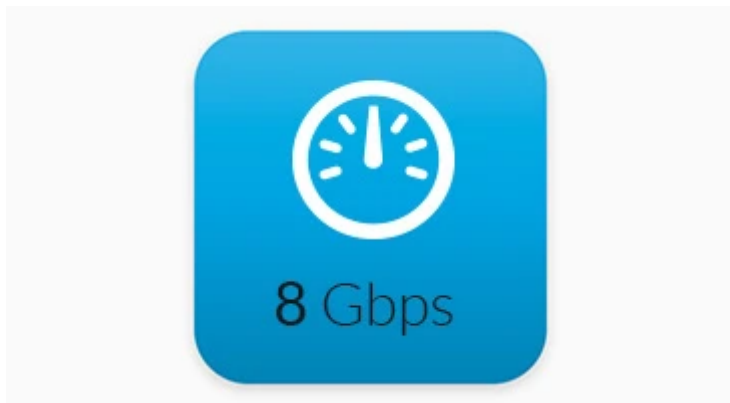

### 8-port managed Gigabit switch

Ubiquiti USW LITE-8-POE is a fully managed **layer 2 switch with eight Gigabit Ethernet ports for RJ45 Ethernet devices**. The switch also offers automatic 802.3at PoE + detection, which provides a total PoE power of 52 W for UniFi access points or other PoE devices. **Switch with PoE power and PoE Passthrough** function is ideal for cleanly adding Ethernet ports when needed with an adapter to power PoE devices.

### Non-blocking capacity

Ubiquiti USW-Lite-8-PoE switch is equipped with Gigabit Ethernet ports in a compact housing. The UniFi switch provides a total, non-blocking bandwidth of up to 8 Gb/s

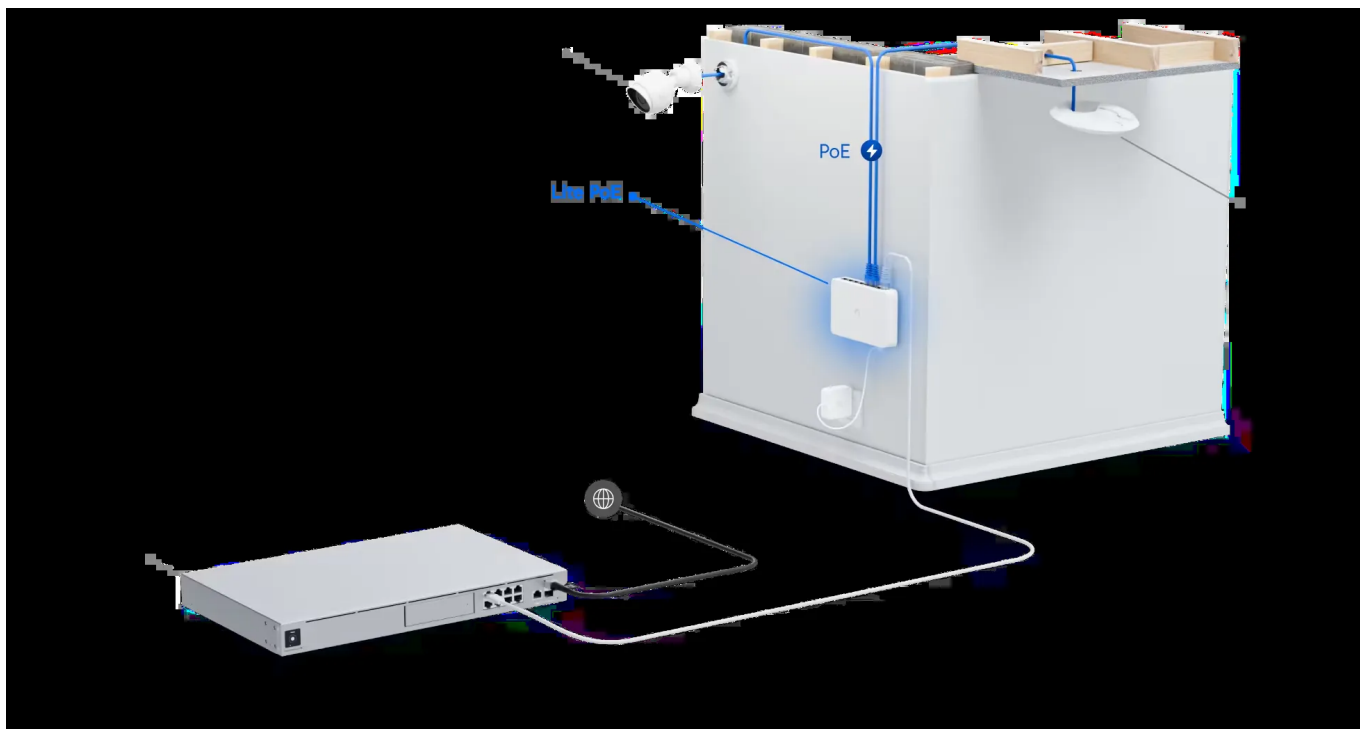

## Switching capacity

The UniFi switch offers the ability to transmit traffic to all ports simultaneously at link speed without packet loss, with switching speeds up to 16 Gb/s.

## Seamless integration

The installation of a cloud-based UniFi OS Console can be managed by multiple UnFi sites in one centralized interface. Each site is logically separated and has its own network monitoring, configurations, maps, statistics and administrator accounts.

## Features:

- 8 Gigabit RJ45 ports, including (4) 802.3at PoE ports +

- Managed by the UniFi OS Console (5.13.10 or higher)
- External 60 W power supply.
- Mountable on the wall
