Full product description

Ubiquiti USW-Ultra

The **Ubiquiti UniFi Switch Ultra (USW-Ultra)** is an 8-port Layer 2 gigabit PoE switch that delivers superior network performance in a compact form factor. It's ideal for small businesses, home offices and other environments where space is limited and reliable PoE connectivity is essential.

Advanced PoE Capabilities

UniFi Switch Ultra is equipped with **8x Gigabit Ethernet 10/100/1000 Mbps** ports, including **7x Gigabit Ethernet PoE 802.3af/at** 30W per port to provide power to PoE-powered devices, and has **1x Gigabit Ethernet PoE PoE-in port** to provide power for the switch itself. When **PoE** is used to power the switch, the total available PoE power reaches **42W**, when **PoE** is used at the input, the total PoE power reaches **16W**, and when standard PoE is used, the total **PoE** power reaches **8W**, providing enough power for connected devices.

Advanced Network Management Features

The USW-Ultra acts as a **Layer 2 switch**, supporting advanced features such as **VLAN, port mirroring and port bonding** for improved network management and control. With these features, the switch enables efficient management of network traffic and enhances network security.

Compact Design and Ease of Installation

This switch takes up little space and can be easily mounted on a wall or flat surface, making it ideal for deployments where space is limited. It also has a **magnetic base** so it can be mounted anywhere, adding to its mounting flexibility.
