Full product description

UniFi Video Camera G3 Flex - build a surveillance system

UniFi Video Camera G3 Flex is a surveillance camera that has a wide-angle lens and 1080p video resolution, providing monitoring with a wide field of view. The **Ubiquiti** camera gives you the opportunity to build a surveillance system with any number of cameras. Many mounting options - you can mount the camera on your desk, wall or pole, both in indoor and outdoor installations. Infrared LEDs and an automatic infrared filter ensure high quality video day and night. The G3 Flex also has an adjustable lens and swivel base for vertical and horizontal viewing angle adjustment.

Manage cameras with the UAS-XG application server and the UVC-NVR-2TB DVR

The UniFi application server and the UniFi NVR are equipped with UniFi Video installed by default, which enables the immediate deployment of the **UniFi application server** to configure and manage UniFi video cameras.

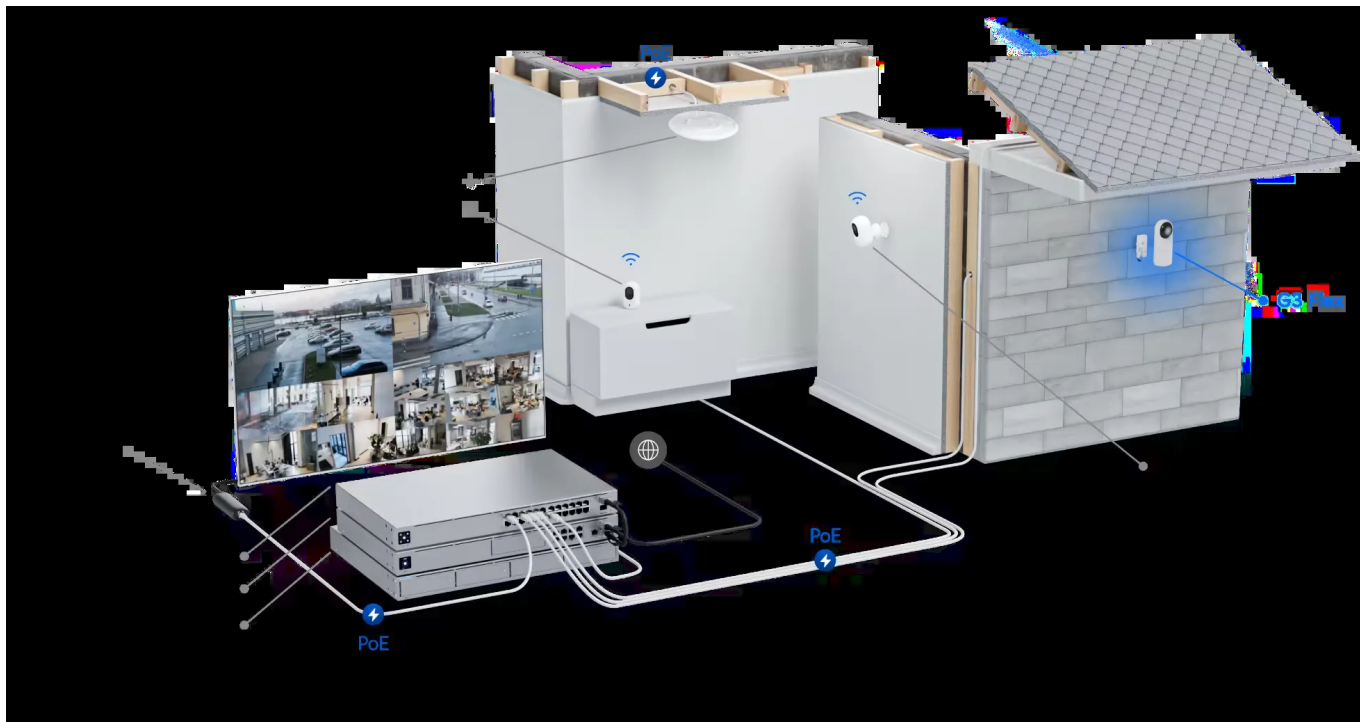

The angle of view or monitoring range of the G3 Flex can be changed at any time.

Tilt the lens up or down for vertical adjustment. Rotate the base left or right for horizontal adjustment.

Protect the installation against surges with Ubiquiti surge protection ETH-SP-G2

Surge protection should be used in all outdoor installations. We recommend using two Ethernet surge protectors, i.e. ETH-SP-G2 model, one near the camera and the other at the point of entry to the building. The ETH-SP-G2 will absorb the surges and safely discharge them to earth.

Special features of UVC-G3-FLEX

- Video resolution: 1080p Full HD, 25 FPS
- EFL 4 mm, $f/2.0$
- Wide angle lens
- 802.3af PoE
- Built-in microphone
- Desk, wall or pole mounting
- Adjustable lens and swivel base for vertical and horizontal angle of view adjustment
