Price: **787.24 zł** gross / 640.03 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGGHHSFRMMGQ

Product features

Height	64.5 mm
LED indicators	Yes
Sensor type	CMOS
Connectivity technology	Wired
Maximum resolution	2688 pixels
Power consumption (max)	5 W
Night mode	Yes
Humidity measurement range	0 - 90%
Harmonized System (HS) code	85258900
Ethernet LAN (RJ-45) ports	1
IK code	IK08
Number of cameras	1
Weatherproof	Yes
Operating temperature (T-T)	-20 - 40 °C
Weight (with stand)	390 g
Lens viewing angle, diagonal	111 °
Total megapixels	5 MP
Lens viewing angle, vertical	60 °
Lens viewing angle, horizontal	86 °
Video formats supported	H.264
International Protection (IP) code	IPX4
Ethernet LAN	Yes

Built-in speaker(s)	Yes
Number of sensors	5
Built-in HDD	No
Power source type	DC
Product colour	White
Mounting hardware type	Ceiling
Type	IP security camera
Diameter	109.2 mm
Designation	Indoor & outdoor
Product weight	370 g

Full product description

UniFi Protect G4 Dome Camera

UniFi**Protect G4 D**ome Camera is a new surveillance dome camera that has received many improvements. UniFi Protect G4 Dome is a versatile camera designed for installation in video **surveillance systems** in offices, warehouses, residential premises, educational institutions. The compact, **four-megapixel** UniFi Protect G4 Dome provides clearer images than the previously available UniFi Protect G3 Dome, which was limited to a maximum resolution of **Full HD (1080p)**.

High quality video, even in the dark

High-quality video recordings from the UniFi Protect G4 Dome are extremely detailed in **daylight** and **low-light** conditions, and every detail is clearly visible **even in the dark** thanks to integrated infrared LED lighting. **Television frame rate** makes surveillance footage comfortable to the human eye, with no stuttering or "slideshow" effect, even with a rapidly changing scene in the frame. **Motion detection** adds the ability to configure scenarios to automatically process events in the frame. Compared to the UniFi Protect G3, the UniFi Protect G4 dome camera image is softer but has a **wider dynamic range**, with much better detail in shadows.

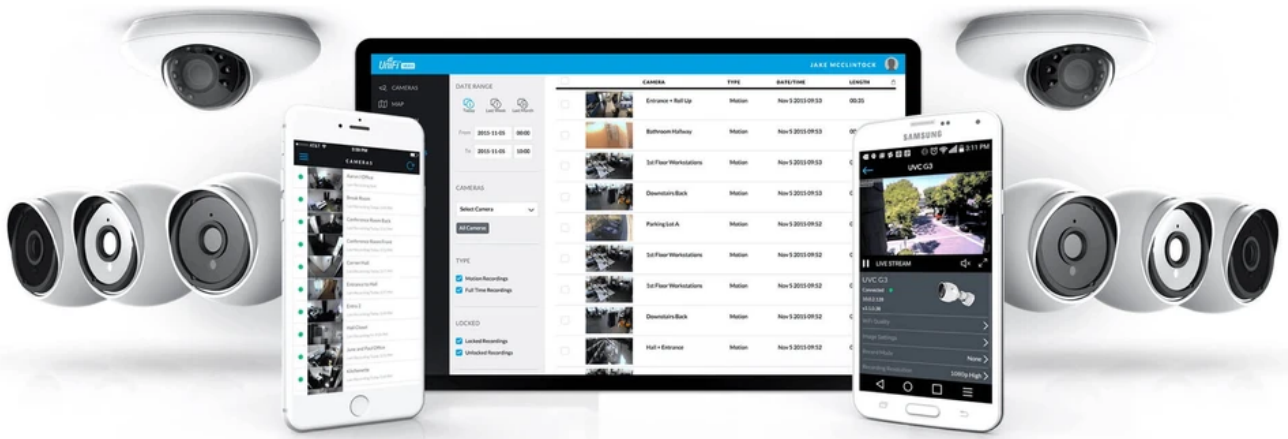

High-quality wide-angle lens and PoE power supply

The wide angle lens with large field of view provides higher quality images than the previous model. Only one Ethernet cable is required to connect the UniFi Protect G4 Dome. **802.3af PoE power** to the camera is provided along with the video stream. The camera housing has also been updated to protect the UniFi Protect G4 Dome from environmental influences, it is made of **metal** and is more **compact** than the UniFi Protect G3 Dome.

Good protection and easy handling

The vandal resistant housing of the UniFi Protect G4 Dome can withstand an impact energy of 5 joules and is splash resistant (IPx4). The **microphone and speaker** are installed inside the UniFi Protect G4 Dome housing. The UniFi Protect G4 Dome requires the UniFi Protect software to fully access its features, so it is recommended to use the camera in conjunction with [UniFi Dream Machine Pro](#), [UniFi Protect Network Video Recorder](#) or [UniFi Cloud Key Plus](#).
