Price: **839.07 zł** gross / 682.17 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGHIPPMRNMHM

Information:

Ubiquiti UVC-G6-Turret is a durable 4K IP camera for indoor and outdoor surveillance, offering 8 MP footage at 30 FPS, a wide viewing angle and a 1/1.8" CMOS sensor for clear detail. PoE power simplifies installation, while integration with UniFi Protect ensures convenient management. The camera operates around the clock thanks to IR night mode up to 30 m and AI functions that detect people, vehicles and animals, with the ability to recognise faces and licence plates. The IP66 housing made of aluminium and polycarbonate, together with IK04 resistance, guarantees reliability in harsh weather conditions.

Full product description

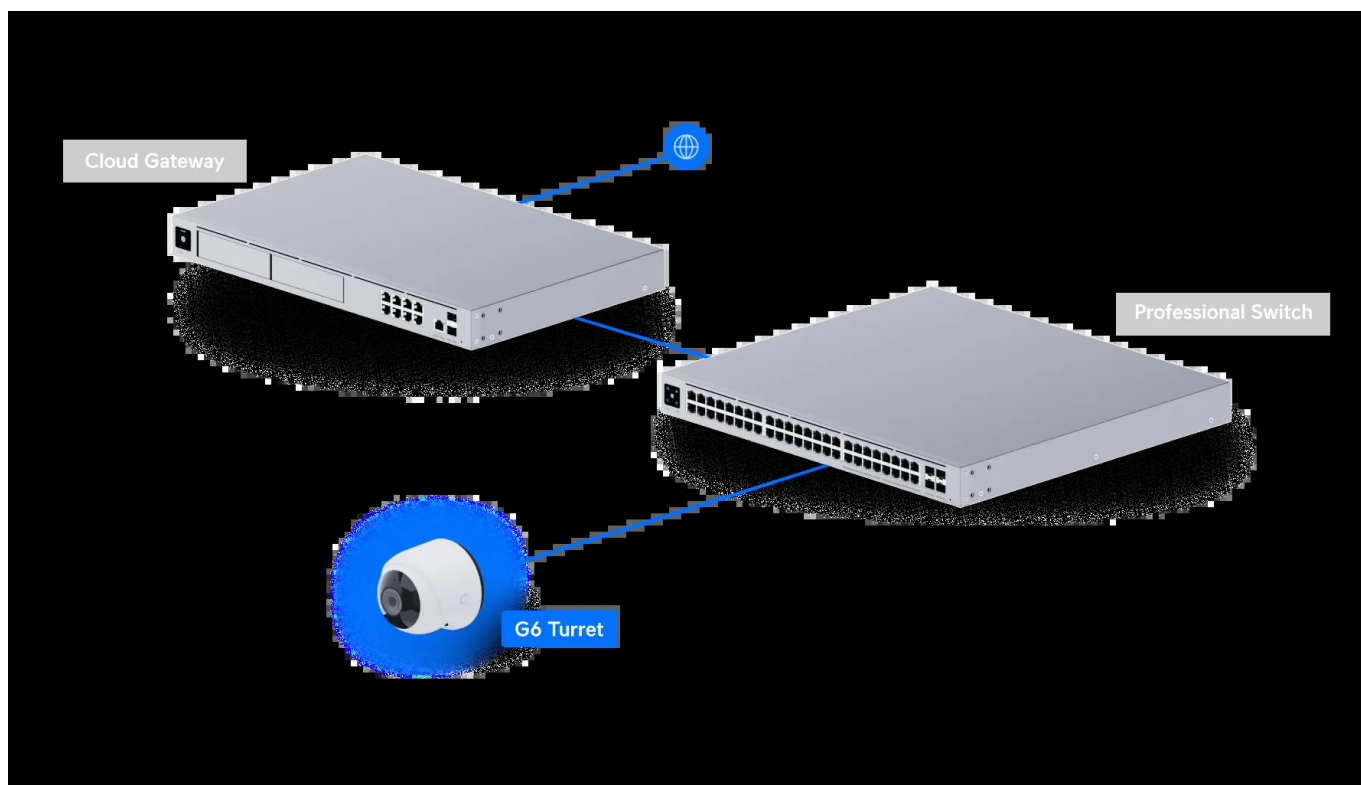

Ubiquiti UVC-G6-Turret - IP Camera Ready For Any Condition

Get control of your security with **the Ubiquiti UVC-G6-Turret camera**, which combines **4K resolution**, artificial intelligence (AI) and a durable housing. It's **an IP camera with PoE** that works reliably day and night, providing clear video and simple operation through **UniFi Protect**. Whether you're protecting a private property, a corporate facility or an outdoor area, **the G6 Turret** offers the features you really need.

4K Resolution and Detail Without Fleeing Frames

The **UVC-G6-Turret** records video at **3864 x 2160** resolution (**8MP**) at **30 FPS** to capture all the important details. The wide-angle lens (H: 109.9°, V: 56.7°, D: 134.1°) allows you to cover a large area without having to reposition the camera. The employed **1/1.8" CMOS** sensor guarantees **clear and crisp images** - regardless of the time of day.

PoE - Simple Installation and Stable Power Supply

The camera uses **PoE power**, so you only need one Ethernet cable for data and power transmission. There is no need for an additional power source, which simplifies and speeds up **installation**. A standard **RJ45 10/100 Mbps** port provides reliable communication for **UniFi Protect** systems .

IR and AI Night Mode - Uninterrupted Monitoring

The built-in **IR LED and IR filter** enable night operation at distances of up to **30 meters**, providing effective surveillance 24/7. The camera supports **AI with human, vehicle and animal detection functions**, as well as **face and license plate recognition**. This not only allows you to see more, but also to **better analyze and respond** to potential threats.

Rugged IP66 Enclosure - Ready for Outdoor Conditions.

IP66 housing made of **aluminum and polycarbonate** protects the camera from rain, dust and mechanical damage (IK04 resistance). It operates in temperatures from -30°C to 50°C, making it suitable for various climate zones. **Wall or ceiling** mounting is possible, and optional accessories allow for boom, box or overhang mounting.
