Price: **10,282.39 zł** gross / 8,359.67 zł net

Manufacturer: UBIQUITI

Referention number: DNXXGHJNKJRMKKH

Product features

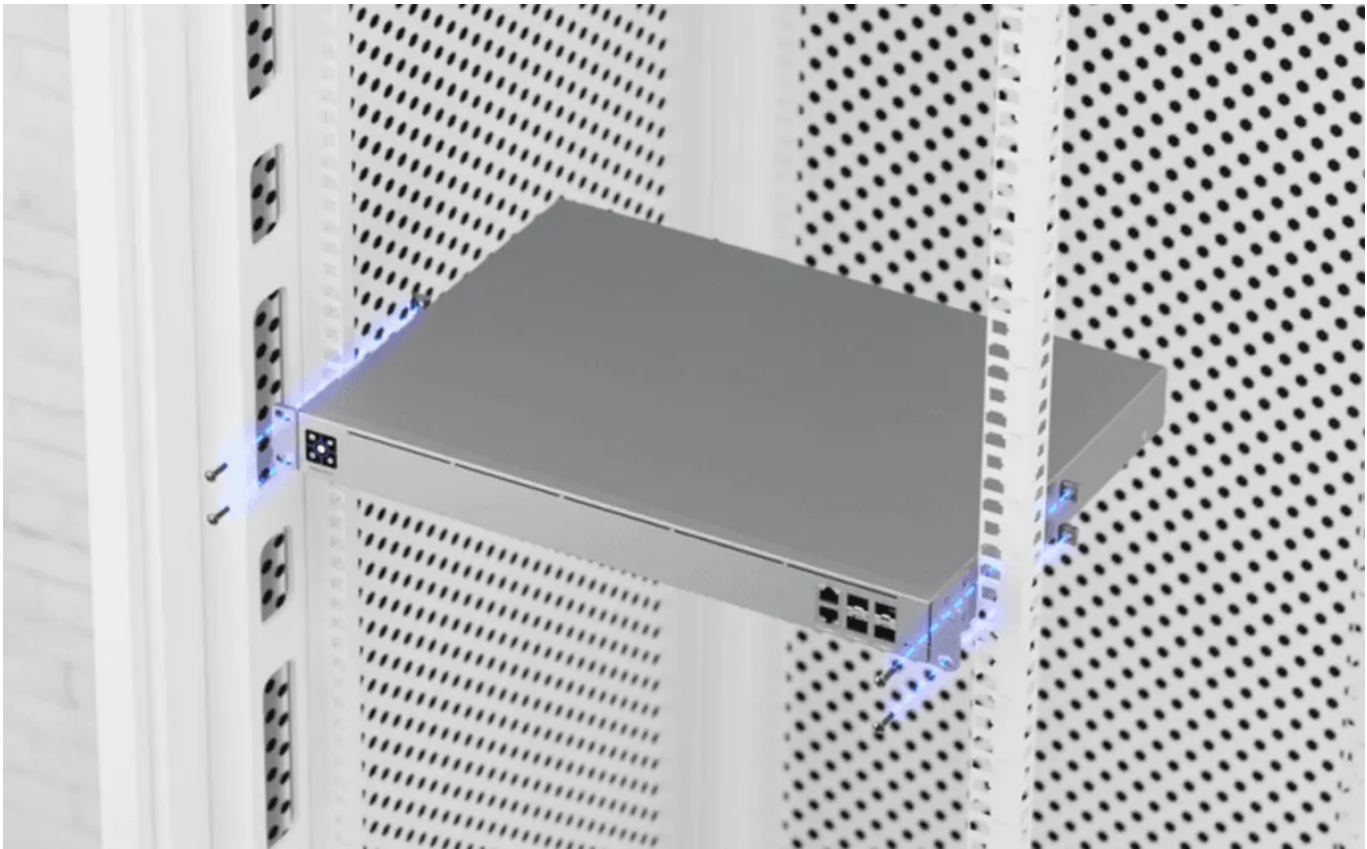

Height	43.7 mm
Input voltage	100 V
LED indicators	LAN
Firewall security	Yes
Width	442.4 mm
Depth	325 mm
Power management	150 W
Input current	7 A
Compliance certificates	CE
Power consumption (max)	82 W
Humidity measurement range	5 - 95%
VPN support	Teleport Zero-Configuration VPN ✓ WireGuard ✓ OpenVPN ✓ L2TP ✓
Ethernet LAN (RJ-45) ports	2
SFP+ ports quantity	2
Processor family	ARM Cortex
Input frequency	50 Hz
Operating temperature (T-T)	0 - 40 °C
Rack capacity	1U
Reset button	Yes
Dynamic DNS (DDNS)	Yes
Internal memory	16000 MB

Number of processors installed	1
Processor manufacturer	ARM
Built-in processor	Yes
Product colour	Grey
Mounting hardware type	Rack mounting
DHCP server	Yes
Watch case material	Aluminium/SGCC
Control panel	Yes
Product weight	6500 g

Full product description

Ubiquiti UXG-Enterprise - Performance for your Network

The **Ubiquiti UXG-Enterprise Router** is a device that will put you in full control of your network, offering powerful management capabilities and configuration flexibility. With support for **UniFi** technology , **2x 2.5 GbE RJ45**, **2x SFP** and **2x SFP28**, this **gateway** delivers unmatched speed and stability. Designed for intensive business environments, it offers **maximum throughput** and powerful security features

High Link Speed and Bandwidth

The Ubiquiti UXG-Enterprise offers **2 2.5 GbE RJ45 ports**, **2 SFP ports** and **2 SFP28 ports** to build a fast and efficient network. With these ports, the device supports bandwidths of up to 25G, ideally suited to modern **Ethernet** and fiber connectivity requirements. This solution ensures stable connections even with heavy network traffic, which works well for data-intensive enterprises.

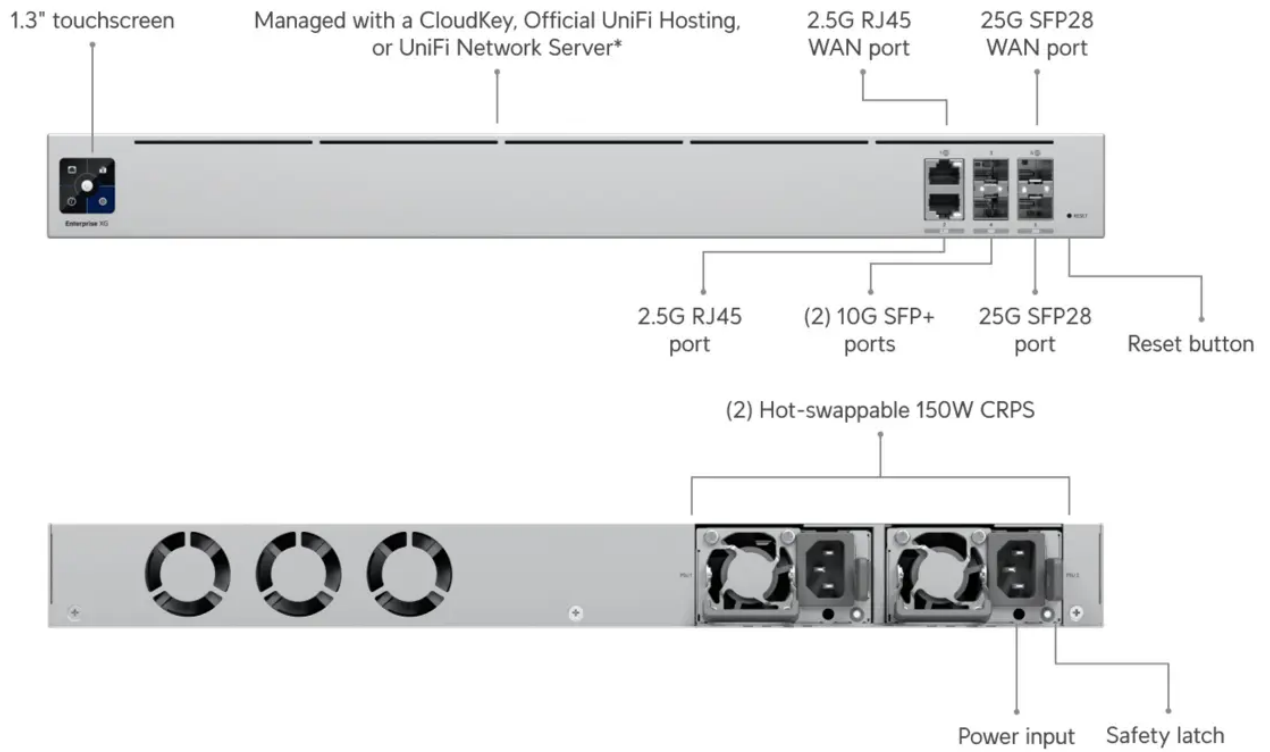

Advanced Security Features

The **Ubiquiti UXG-Enterprise** is equipped with a **stateful firewall**, application-aware Layer 7 firewall and SSL/TLS inspection features. With these features, the device provides **high-end network protection** against malicious traffic and attacks. In addition, with the help of **Intrusion Prevention System (IPS)** and **Intrusion Detection System (IDS)** technologies, the device monitors and protects the network from unwanted activities, ensuring its integrity.

Ease of Management and Configuration

Integration with the **UniFi Network** platform makes configuration and management of the **Ubiquiti UXG-Enterprise** router easier. The ability to **centrally manage** from a cloud-based application makes the device ideal for extended networks. **UniFi Cloud Key Gen2** enables remote monitoring and configuration of the router, which is convenient when you need to manage multiple devices in different locations

*With UniFi Network 8.2.93 and later.

Support for VPN and SD-WAN

The router supports **Site-to-Site VPN**, **IPsec**, **WireGuard**, as well as **Teleport Zero-Configuration VPN** for fast and secure connection to other networks. **The SD-WAN** (Software-Defined Wide Area Network) **license** provides the flexibility to manage traffic between different network points. With these features, the router becomes an effective solution for businesses requiring advanced configuration and inter-network connectivity
