Full product description

Galactic projection at your fingertips - Wanbo EVA star projector

Transport your room to cosmic corners with the **Wanbo EVA Capsule Galaxy Light** Projector. This device offers astounding projections of the starry sky and dynamic ocean wave effects. Let the beauty of the cosmos engulf your space, creating an amazing atmosphere in any interior. Create an atmosphere full of magic and tranquility in your home with the Wanbo EVA Capsule Galaxy Light Projector, which provides not only **spectacular visual effects**, but also the **perfect sound background** for your evenings of relaxation.

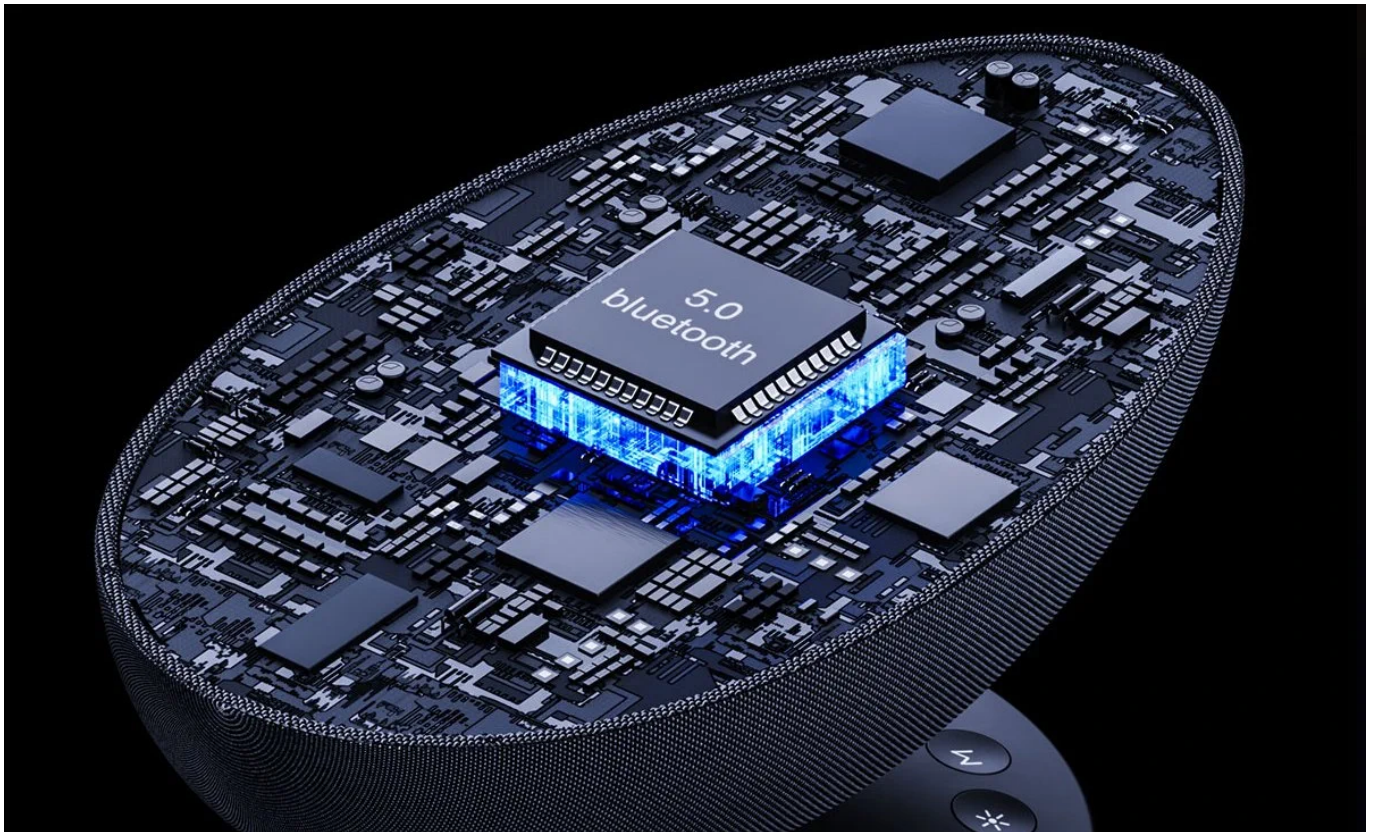

EVA Galaxy Light

Watch the aurora at home

Music from your smartphone and soothing white noise

Enjoy the full experience with music playback via your smartphone thanks to **Bluetooth 5.0** and a **built-in 3W speaker**. The Wanbo EVA allows you to enjoy **white noise** and music to promote relaxation and meditation. Connect your device to the projector and let the combination of visuals and sound enhance the quality of your relaxation time.

Elegant design and functionality

The Wanbo EVA projector is made of **high-quality materials and components**, so its stylish design blends in perfectly with any interior. The device is compact, and its housing and tilt adjustment (from 0 to 20 degrees) make it easy to adjust the projection angle to suit individual needs. The maximum projection range is 6.4 meters over a total area of up to 20m², and RGB color calibration ensures optimal visual effects.

Advanced features for your comfort

The Wanbo EVA offers a variety of lighting modes, such as **Aurora Night**, **Sea of Blue Star**, **Spectrum of the Moon** and **Starry Night**. With the night light function, the projector emits a soft and gentle light that is ideal for falling asleep. Adjustability allows you to change the shapes of the stars, the use of a timer with automatic shut-off after 30, 60 or 120 minutes guarantees a peaceful sleep under the Aurora.
