Full product description

Car holder with Mi Wireless Car Charger

The Xiaomi Redmi Wireless Car Charger combines a wireless charger and a phone holder. Tempered glass has been placed on the front of the holder which protects the charger from unwanted scratches and damage. The case is made of high-quality polycarbonate (PC), and the adjustable width makes it fit most smartphones. The accessory is designed for traveling users, and allows **wireless charging** with up to 20 watts of power.

Xiaomi Car Charger Auto Holder

Forget about plugging in inconvenient cables while driving. Simply place any **phone with wireless charging** on the cradle, and **the Xiaomi Wireless Car Charger 20W** will expressly charge it. The Xiaomi car holder is compatible with most cell phones on the market that support wireless charging, such as the Xiaomi Mi 11, Samsung Galaxy S20 or iPhone Xs Max.

Key features

Xiaomi super-fast wireless charging

Super-fast wireless charging with a maximum power of 20W will charge your smartphone's discharged battery from 0% to 45% in half an hour, and **fully charged in 90 minutes**. The Xiaomi Mi Car Charger 20W wireless charger is **fully compatible with any smartphone** that supports wireless charging. No matter what brand the device is, **it will charge at maximum speed**. With its advanced technologies, Xiaomi has become the face of wireless charging.

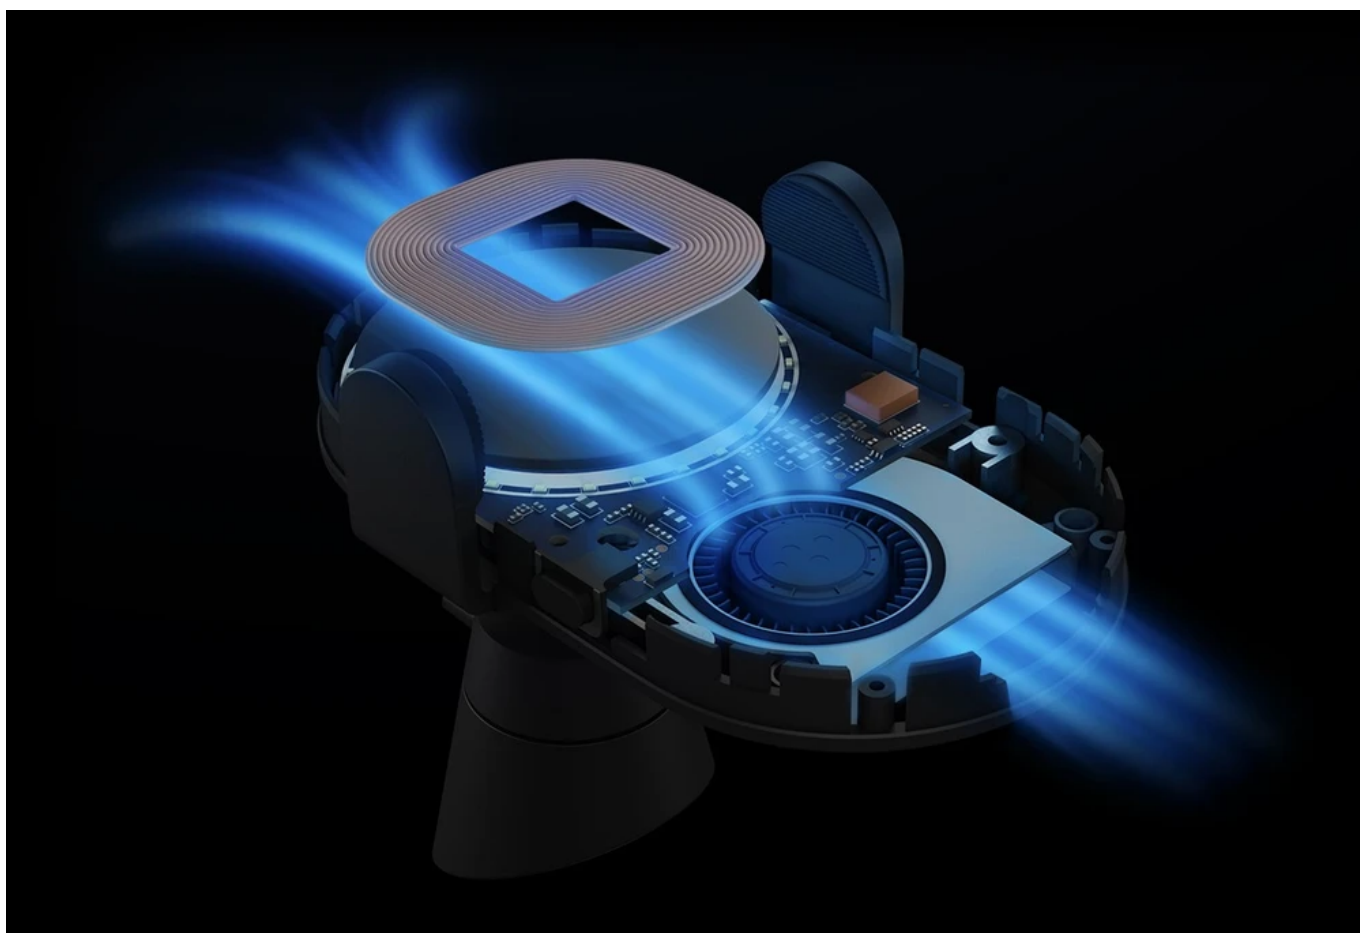

Electrically adjusted arm

A hidden **infrared sensor** detects the size of the smartphone, automatically tapers or expands, and then locks in place. Infinite and multi-angle adjustment allows you to position your phone as needed.

Multi-level protection - dual fan and metal heat sink

The independent fan in the **car charger** intelligently regulates temperature and cools. The built-in metal bracket features fast heat conduction. Double heat dissipation during high-power charging reduces the temperature of the cell phone and shortens the charging time.

Security

Instant assembly

The bracket should be clipped into the air grille or attached with the included adhesive base. The kit includes a standard stick base, flexible silicone protection **to prevent damage to the air outlet grille** and a cigarette lighter adapter. The device features **full compatibility** with inductively charged smartphones.

USB-C cable

The compact **Xiaomi Mi Wireless Car Charger 20W** provides more than just wireless charging. When our co-passenger's smartphone does not support this technology, we can use the included **USB-C cable** and charge their device.

Modern design, convenient operation, express charging

Rounded 2.5D tempered glass serves as the base of the charging panel. The ring-shaped welcome light lights up when the power is turned on and **makes it easier to find the handle**. Rounded sides improve heat dissipation efficiency, which **speeds up charging**.
