AC input voltage	220 V

Hinged lid	Yes
Product colour	Stainless steel
Auto power off	Yes
Power	1800 W
Anti-calc filter	Yes
Watch case material	Stainless steel
Product weight	1110 g

Full product description

Xiaomi Double Wall Electric Kettle - Fast Boiling and Safety

The Xiaomi Double Wall electric kettle with a capacity of **1.7 L** and a power of **1800 W** enables water to be boiled quickly for the whole family. The double housing made of high-quality ABS stainless steel and polished 316L steel not only keeps the water temperature for longer, but also minimises the risk of burns when touching the surface. The design has been carefully considered so that every element, from the interior to the lid, is easy to clean and durable for many years of everyday use.

Double Housing and 316L Steel - Safe and Clean Water

The kettle is equipped with a double housing made of **food-grade 316L stainless steel**, which comes into contact only with water, eliminating the risk of a metallic aftertaste or contamination. This design helps maintain the purity and healthiness of the water, regardless of how many times it is used. The inside of the kettle has been designed to keep the water at the right temperature for longer, which is particularly useful when preparing drinks throughout the day.

1800 W Power and STRIX Thermostat - Fast and Reliable Boiling

The Xiaomi kettle uses **1800 W** of power and a proven **STRIX** thermostat, tested for over 10,000 cycles, making water boiling fast and reliable. This feature saves time and energy while maintaining consistent appliance performance. The STRIX thermostat, combined with four safety functions, protects against overheating and boiling dry.

Safety and Comfort - Double Lid and Protection System

The kettle has a double lid design that cushions steam and reduces the risk of burns when pouring water. The push-type lid opens at an angle of 65°, minimising the risk of splashing hot water. The four-protection system additionally guards against overheating, dry boiling and other potentially dangerous situations, making everyday use fully safe.

Ergonomics and Convenience - Large Capacity and Simple Operation

The kettle with a capacity of **1.7 L** is enough to boil 8 cups of water, which is convenient for families or during gatherings. The ergonomic handle and lightweight design make pouring water easy, and the lid-opening mechanism allows water to be poured quickly into a mug or pot. Thanks to these features, everyday use of the kettle becomes comfortable and practical, and preparing tea, coffee or meals takes minimal time.

Wylewka o zakrzywionej krawędzi

Wspaniała wylewka o zakrzywionej krawędzi zapobiega wyciekom i poparzeniom w wyniku przypadkowego pochylenia

Use - For Families and Health-Conscious People

The kettle is ideal for everyday use, quickly boiling water for tea, coffee or cooking. The large capacity is perfect for families, and the food-grade 316L stainless steel guarantees water with no contact with plastic. It is a practical solution for those who value health, clean water, and efficient and safe boiling.
