Information:

Xiaomi Electric Glass Kettle is an electric kettle with a capacity of 1.7 l, ideal for preparing drinks for a larger number of people. Made from durable borosilicate glass and food-grade materials, it ensures safe use, no unwanted odours, and easy monitoring of water cleanliness. The 2200 W power allows water to boil in around 5 minutes, while the LED operating indicator makes it easy to use. The ergonomic handle, one-handed lid opening and removable filter increase convenience. Four-stage safety protection, including automatic shut-off and boil-dry protection, ensures safety every day.

Product features

On/off switch	Yes
Lockable lid	Yes
Control type	Buttons
AC input frequency	50 Hz
AC input voltage	220 V
Lid opening type	Button
Removable filter	Yes
Product colour	Black
Auto power off	Yes
Power	2200 W
Watch case material	Glass
Product weight	1100 g

Full product description

Large capacity for any occasion

Xiaomi Electric Glass Kettle is an electric **kettle** that is perfect for large gatherings. With a **capacity of 1.7 liters**, it will easily serve any large group. Whether you're having guests over for coffee or preparing tea for a family gathering, this kettle will allow you to serve large quantities of beverages.

High quality and safety

The kettle is made of **borosilicate glass**, which guarantees high quality drinking water. This durable material is **resistant to cold and heat**, ensuring long life and safe use. This allows you to boil water with complete peace of mind, regardless of the conditions.

Healthy and safe water

The use of food-grade materials in the kettle's construction makes the **water healthy and safe to drink**. The kettle is free of odors, and its **transparency** makes it easy to identify any impurities. All this ensures healthy and safe water for the whole family.

Intuitive operation and efficiency

The Xiaomi Electric Glass Kettle is equipped with **an LED operation indicator**, which informs you about the water boiling process. With a **power output of 2200W**, water will boil in just 5 minutes, saving you valuable time. **The ergonomic handle and one-handed lid opening**

allow convenient use without the risk of steam burns.

Better water quality

The kettle has a **removable filter** that effectively removes impurities for cleaner water. **The filter is easy to clean**, adding to the convenience.

Advanced technology and protection

Thanks to **an advanced thermostat with a thick aluminum heating plate**, water is heated evenly, which translates into healthier drinking water. The kettle is equipped with **four-stage power protection**, ensuring complete safety of use. Automatic shut-off after boiling and detecting dry cooking, fuse protection and electric shock protection guarantee peace of mind.
