Information:

Xiaomi Electric Shaver S101 is an efficient electric shaver with a dual 18-blade system and 3 sets of double foils, delivering fast, precise and clean shaving. Three independently floating heads adapt to the contours of the face, making it easier to shave even hard-to-reach areas. Intelligent speed control maintains stable power, while the USB-C rechargeable battery charges in 1.5 hours and lasts for up to 60 days of use. IPX7 water resistance allows wet and dry shaving and easy cleaning, while the travel lock and battery indicator enhance convenience at home and on the go.

Product colour	Blue
Number of shaver heads/blades	3
Shaver system	Rotation shaver

Full product description

Reliable Blades for Faster and More Accurate Shaving

Xiaomi Electric Shaver S101 is equipped with an innovative dual 18-blade system, which ensures fast, clean and reliable shaving. Thanks to the upgrade **to 18 blades**, the shaver offers exceptional performance, allowing you to achieve a smooth and neat face with every use. High-density blades guarantee a close shave, eliminating any traces of stubble.

Dual Foils for Increased Efficiency

The shaver is equipped with 3 sets of dual foils, which can shave **3 times more** hairs in one stroke compared with single foils. Thanks to the **1:2** ratio of the inner and outer foil teeth, shaving efficiency is significantly increased, saving time and delivering a close shave in less time.

Independently Floating Heads for Precise Shaving

Xiaomi Electric Shaver S101 has 3 independently floating shaving heads, offering **6 shaving angles**, making it easy to shave even the most difficult areas of the face. These heads precisely adapt to the contours of the face, flexibly shaving hard-to-remove hair and stubble, ensuring comfortable and close shaving.

Intelligent Speed Control for Stable Operation

The **Xiaomi** shaver provides constant, high-speed shaving thanks to intelligent speed control, which maintains strong power even when the battery level is low. This allows for continuous shaving without pulling hairs, ensuring fast, comfortable and stress-free shaving.

Long-Lasting Battery and Fast Charging

The shaver is equipped with an efficient **lithium-ion** battery, which allows a full charge within **1.5 hours**. As a result, it provides **60 days** of stress-free use with daily one-minute shaving. It is an ideal solution for business trips or holidays, helping you stay fully powered and ready to go.

Safe and Waterproof Design

Using the universal **Type-C** port, the **Xiaomi** shaver offers easy and stress-free charging, both at home and on the go. The **IPX7** waterproof rating allows for easy rinsing and hassle-free wet and dry use. The removable shaving head makes quick cleaning easy, eliminating any remaining hairs.

Thoughtful Details for User Comfort

Simplicity and functionality are key features of the **Xiaomi Electric Shaver S101**. The travel lock prevents the shaver from being switched on accidentally in your luggage, and the battery charge indicator reminds you when it needs charging, making every journey stress-free and comfortable.
