Referention number: DNXGGKPPGRMMMP

Information:

Xiaomi Electric Shaver S301 is a modern shaver that provides fast, thorough and comfortable shaving without nicks. The double foils increase the effectiveness of hair capture, while intelligent speed control and two power levels adapt to the type of stubble and more difficult areas of the face. Flexible blades and floating heads follow the contours better, reducing pressure on the skin. The clear LED display shows the device status, reminders and battery level. The shaver is IPX7 waterproof, easy to clean and ideal for travel thanks to USB-C charging and up to 90 days of use after 2 hours of charging.

Water-resistant	Yes
Display type	LED
Rechargeable	Yes
Product colour	Black
Built-in display	Yes
Number of shaver heads/blades	3
Shaver system	Rotation shaver

Full product description

Intelligent and Fast Shaving Without Nicks

Xiaomi Electric Shaver S301 is a modern shaver that offers fast and comfortable shaving without the risk of nicks or trapped hairs. Thanks to dual-track foils and two adjustable speed levels, this shaver adapts perfectly to your face, ensuring convenient and effective shaving. Intelligent speed control prevents nicks, and the modern **LED** display allows you to monitor the device status in real time.

Dual Foils for Faster and Cleaner Shaving

Xiaomi S301 shaver is equipped with dual foils, which increase the amount of hair captured by **50%** compared with traditional single-sided foils. As a result, shaving is faster and more precise. Intelligent speed regulation automatically adjusts the motor power to the load on the shaving heads, ensuring efficient and comfortable shaving without stopping or snagging.

Flexible Blades and Bionic Geometry

Thanks to flexible blades, the **Xiaomi S301** shaver adapts perfectly to the contours of the face, making shaving easier. The bionic manta-shaped foil geometry allows for even more precise shaving, adapting to every surface of the face. Multiple floating shaving heads reduce pressure and provide greater comfort, especially when shaving difficult areas such as the neck and jawline.

Two Optional Speed Levels

The **Xiaomi S301** shaver has two optional speed levels that automatically adapt to every type of beard. Simply press and hold the button for 1 second to switch levels, enabling easy and effective shaving of both fine and thick stubble. Intelligent speed automatically increases in difficult areas, guaranteeing precise and fast shaving.

Convenient Monitoring and Easy Cleaning

The **Smart LED** display on the **Xiaomi S301** shaver allows you to monitor the device status in real time, providing information such as travel lock, cleaning reminder, error alert and power indicator. The anti-fingerprint coating reduces fingerprints and smudges, making it easier to clean and keep the shaver in excellent condition. The shaver is also **IPX7** waterproof, allowing for easy dry and wet cleaning.

Ideal for Travel

Xiaomi **Electric Shaver S301** is an excellent travel companion thanks to its long battery life on a single charge. The universal **Type-C** port allows charging from various devices such as smartphones, computers or power banks. A full charge in **2 hours** provides **up to 90 days** of use, making it an ideal solution for frequent travellers.
