Full product description

Xiaomi Hair Clipper - Professional hair care at home

With the Xiaomi Hair Clipper, everyday hair styling becomes easy and enjoyable. Equipped with an advanced titanium ceramic blade and a range of features for easy modeling, this hair clipper allows for precise and convenient cutting, regardless of hair type. With a long run time on a single charge, it is an ideal choice for those who value quality, convenience and reliability.

Precise adjustment of cutting length

The Xiaomi Hair Clipper razor offers millimeter-level cutting length adjustment for a perfectly tailored result. The five-stage blade adjustment (0.5 mm - 1.7 mm) allows you to create natural transitions, and precise finishing of sideburns and nape lines becomes extremely easy. Thanks to the wide range of combs (from 3 mm to 41 mm), it's easy to achieve a variety of hairstyles, such as buzzcut, textured quiff or classic pompadour.

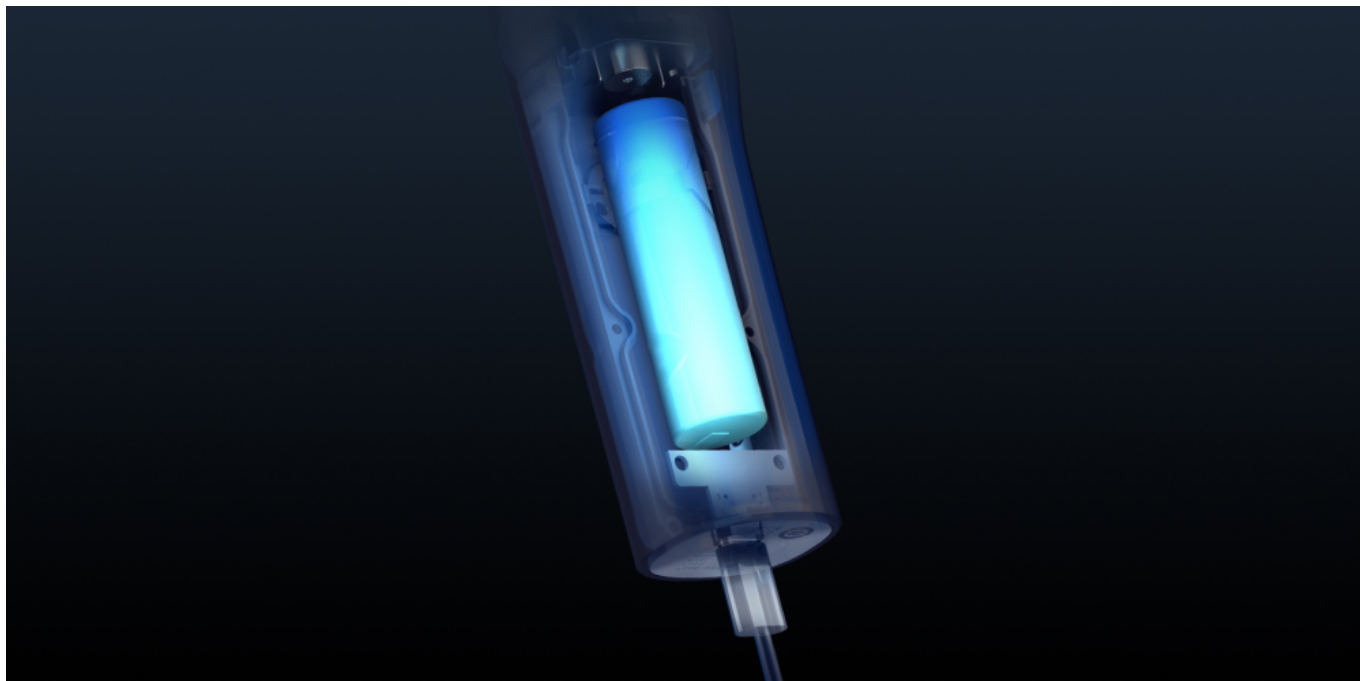

High-quality titanium ceramic blade

The heart of the Xiaomi Hair Clipper is a movable blade coated with titanium ceramic, which stands out not only for its excellent sharpness, but also for its exceptional durability. The aerospace materials used make the blade resistant to corrosion, while taking care of the health of the scalp. The razor retains its sharpness even after 300 hours of use, ensuring long-lasting performance. Thanks to the titanium coating, the blade is also resistant to mechanical damage, making the razor ideal for any hair type.

Long working time and fast charging

Using a capacious lithium battery, the Xiaomi Hair Clipper can run for up to 180 minutes on a single charge. The razor has a Type-C charging port, which allows for easy and quick recharging. What's more, the razor can be used while charging, eliminating the problem of low battery during use.

Powerful motor and quiet operation

The razor is equipped with a high-speed motor (6200 revolutions per minute) and high torque, which ensures effective clipping even with thick and hard hair. With all this, the device works extremely quietly - the noise level does not exceed 50 dB(A), which makes cutting comfortable and pleasant for both the user and the environment.

Waterproof and easy to clean

The Xiaomi Hair Clipper has an IPX7 waterproof rating, which means it can be safely washed under running water. This makes it much easier to keep the device clean, thus ensuring hygiene during every use. In addition, the razor is equipped with a smart no-oil indicator that reminds you to maintain the blade, ensuring long life and comfort.

The perfect choice for everyone

Whether you need a tool for everyday grooming or a precise device for modeling advanced hairstyles, the Xiaomi Hair Clipper will meet your needs. Convenient length adjustment, durable blade and long battery life make this razor an invaluable tool for anyone who cares about their appearance.
