Full product description

Xiaomi High-Speed Ionic Hair Dryer EU - a dryer that takes care of your hair

If you want to dry your hair quickly and safely, the Xiaomi High-Speed Ionic Hair Dryer is a device that will meet your needs. With its ionization technology, powerful airflow and lightweight design, you can enjoy professional styling in the comfort of your own home. In addition, the dryer is equipped with 8 airflow modes for flexibility and comfort.

Extremely fast drying

The Xiaomi High-Speed Ionic Hair Dryer features a **110,000 rpm** motor that generates a powerful **62 m/s** airflow . This allows the device to dry medium-length hair in just 3 minutes. It's perfect for people living a fast-paced life who don't want to waste time on long drying sessions.

Advanced ionization technology

One of the main advantages of this dryer is the use of **ionization technology**, which helps neutralize static electricity. This means that your hair does not frizz and becomes shinier and smoother. This not only dries your hair faster, but also protects it from damage caused by excessive heat.

8 airflow modes

The High-Speed Ionic Hair Dryer offers **8 airflow modes** to suit different hair types and drying preferences. Whether you have fine, thick, curly or straight hair, you can choose the perfect mode for maximum protection and efficiency.

Lightweight and ergonomic design

With a weight of **only 400g**, the hair dryer is extremely lightweight, making it comfortable to use even during longer drying sessions. The ergonomic shape and comfortable handle ensure easy handling, while the long 1.7m cord gives freedom of movement, which is especially important when styling hair.
