Product features

Product type	Air purifier filter
Height	293 mm
Width	200 mm
Depth	200 mm
Compatibility	Mi Air Purifier
Package type	Box
Brand compatibility	Xiaomi
Product colour	Silver
Product weight	250 g

Full product description

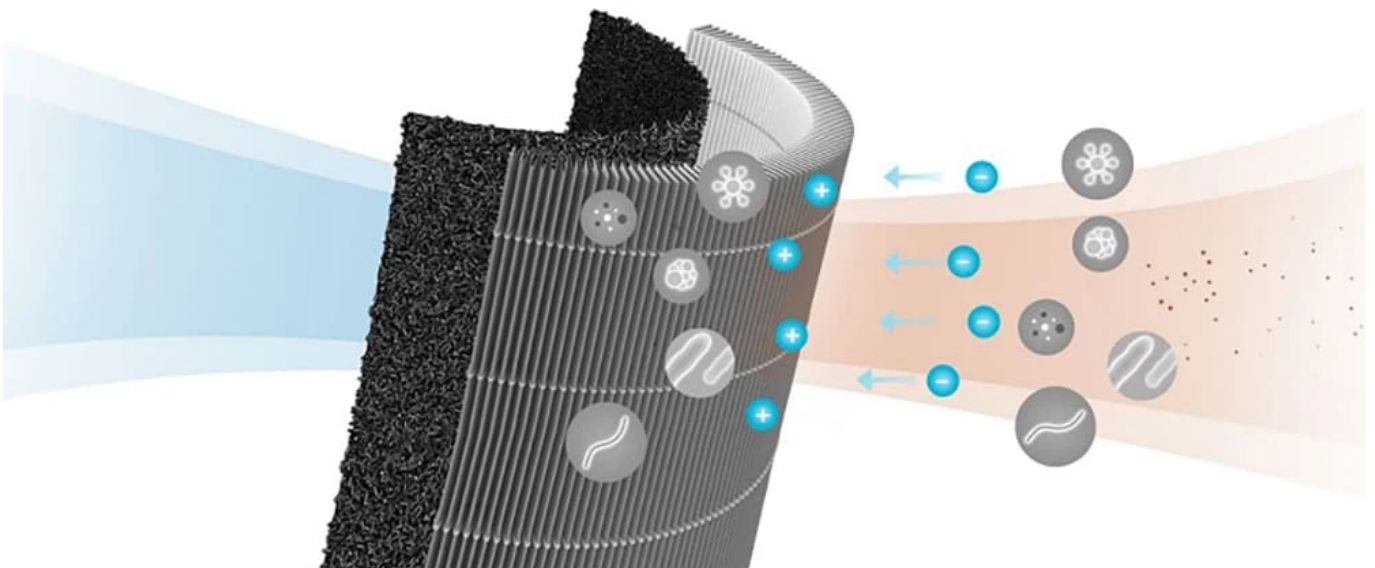

Xiaomi Mi Air Purifier Hepa Filter

Mi Air Purifier Filter. It is made in the form of a cylinder with **HEPA H13** rating, which means that it neutralizes at least **99.97% of** pollutants down to **0.3 microns**. The filter stops viruses, bacteria, fungal spores, pollen and mechanical pollutants, including **PM2.5 and PM10** (the main components of smog).

Best Filtration Materials

The **pre-filter** is a dense mesh that traps larger dirt (crumbs, pet hair, fur, etc.). The **carbon filter**, containing 330 grams of activated carbon, removes formaldehyde and other harmful substances, as well as unwanted and unpleasant odors.

Multi-level cleaning system

The effectiveness of the exchangeable cartridge is ensured by the round construction of the filtering element, the use of special materials and **three levels of purification**, which will make the air in the room **perfectly clean**.

Fresh air and easy replacement

The use of **a unique material** with special filter cartridge manufacturing technology ensures reliable removal of small, heavy particles. The material **retains almost all** airborne **microparticles** and virtually does not slow down the airflow, providing **an immediate cleaning process**. Conventional air purifiers require filter replacement layer by layer. Xiaomi simplifies the operation by combining all three layers. Installing a new filter can be done by hand and takes **seconds**.
